TPARC_2008 Operations Plan of the Day

Date of report(UTC): 2008/09/23 23:50
Author of report: Dick Dirks
Submitted at: 2008/09/24 00:37
Revised at(UTC): 2008/09/24 19:33

Operations Summary:

The P-3,C-130 and Falcon are all down today.

The C-130 is scheduled to fly tomorrow, 25 September(Guam,Japan LT).
The P-3 is scheduled to fly tomorrow, 25 September.
The Falcon is not scheduled to fly tomorrow.

Flight schedules for C-130 and P-3 shown below.

Schedule for C-130 in the next 24 hours;

Event	UTC	Guam LT	MRY LT
Flt Plan	1200UTC 24 Sep	2200 25 Sep	0500 24 Sep
Go/no go	1300UTC 24 Sep	2300 25 Sep	0600 24 Sep
Science Brf/			
Crew alert	1300UTC 24 Sep	2300 25 Sep	0600 24 Sep
Crew brief	1400UTC 24 Sep	0000 25 Sep	0700 24 Sep
C-130 T/O	1700UTC 24 Sep	0300 25 Sep	1000 24 Sep
C130 land	0000UTC 25 Sep	1000 25 Sep	1700 24 Sep
Debrief	0100UTC 25 Sep	1100 25 Sep	1800 24 Sep

Schedule for the NRL P-3 in the next 24 hours;

Event	UTC	Guam LT	MRY LT
Science Brf	1700UTC 24 Sep	0300 25 Sep	1000 24 Sep
Crew Brief	1700UTC 24 Sep	0300 25 Sep	1000 24 Sep
NRL P-3 T/O	2000UTC 24 Sep	0600 25 Sep	1300 24 Sep
p-3 land	0400UTC 25 Sep	1400 25 Sep	2100 24 Sep
Debrief	0500UTC 25 Sep	1500 25 Sep	2200 24 Sep

C-130 requires flight tracks 5 or more hours before take off and a go/no go decision 3.5 hours before launch. Preflight science briefing will be 3 hours in advance of each aircraft departure. Preflight operational brief will be two hours in advance of departure of each aircraft.

Driftsonde operations continue. Flight #13 is operational and is located at,16.8N, 163.5E, at 19.9km altitude, Flight #14 is operational and is located at 20.5N, 171.0E, at 21.6km altitude, Flight #15 is operational and is located at 18.9N, 170.4W, at 27.1km altitude. Flight #16 was launched at 1557UTC, 23 Sept.

The Daily Planning Meeting will be at the regular time:

DPM	2300UTC 24 Sept	0900 25 Sept	1600 24 Sept

SCIENTIFIC OBJECTIVE(S):

Structure change in TCS-047 southwest of Guam

MISSION PLANS:

PRIMARY MISSION:

RAINEX Weather Discussion

For Research Planning Purpose Only

Review of Yesterday's Forecast:

DAY 1 Update:

Recon reports and satellite imagery suggest that Rita is
intensifying and the initial intensity is now set at 50 KT. Rita
has convection firing and becoming better organized over the
last several hours. Rita is under very light southerly shear
from the upper low over Cuba. However, this upper low is
weakening and retrograting eastward, therfore Rita will be in a
low shear environment with very warm SSTs. Intensity guidance is
much higher than 12 and 18Z. SHIPS brings Rita to a hurricane in
24 h, the GFD models in 36 h. Therafter the GFD models make Rita
a major hurricane in the Gulf. Due to the rapid development of
Rita, this forecast is a above the guidance in the short term
and follows the SHIPS and GFDL model in the lon term.

Rita is now moving NW near 8 mph, this motion is expected
through 12-24 hours followed by a westward and poissible south
of west motion once the ridge over the SE U.S. steers Rita. This
track forecast is slightly right of the previous one bringing
Rita into the Florida Keys in 36-48 hours.

Initial (0000 UTC): 22.7N 72.9W 50KT
12 Hour: 23.6N 74.5W 60KT
24 Hour: 24.5N 76.5W 70KT
36 Hour: 24.8N 78.5W 80KT
48 Hour: 24.8N 81.0W 90KT
72 Hour: 24.7N 85.5W 100KT
USE WITH EXTREME CAUTION AS FOLLOWING IS SUBJECT TO LARGE ERROR
96 Hour: 24.9N 91.0W 100KT
120 Hour: 26.0N 95.0W 100KT

Next Forecast: 1500 UTC

Forecaster: Cangialosi

Since the writing of this forecast, Rita has maintained 50KT
intensity, though recent satellite imageyr is showing signs of
some further intensification. The track has remained due west.
Last ngiht's NW motion was likely center reformations closer to

TPARC_2008 Facilities Status Report

Mission Scientist Report, RICO, King Air Flight January 21st, 2005 UW King Air Flight Scientist: Stevens

Figure 1: Images showing cloud field during flight.

General cloud characteristics: The cloud field was rather suppressed with patches of humulus and patches of clear, with tops rarely developing above 4000'. During the day a magnificent tail developed west of Barbuda. This tail had a tremendous radar projection, but faded by the time we worked it, only to redevelop somewhat after we left. Drop concentrations were generally light, near 50 or 75 cm^{-3}.

General Comments: The King Air was the only aircraft in the area as the BAE flew well to the north on this day in search of deeper clouds. The intial plan was to fly along and cross wind segments near the ship for estimating momentum fluxes by fields of shallow cumulus, following a line suggested by Peggy LeMone. Winds proved rather light, as did the shear and cloud field. Indeed echoes were so little in evidence we often turned off the radar, and did not fly legs over the top of the cloud field for which the dual Doppler was desired. Later in the flight we flew a tail pattern which sampled a dissipating tail west of Barbuda, and the period before its subsequent redevelopment.

Overview of Flight Pattern: The momentum patterns were to consist of stacks of four to five legs, along and across the shear. We attempted to coordinate these with the ships heading, and after some initial adjustment settled on a direction. The patterns generally included two levels in the subcloud

[15:42]	*	Now talking on #GV
[15:50]	Fred-GV	dutton_boulder, Hi Geoff, If Eric Hintsa is around could you tell him that my briefcase was stuck on the GV so I did not get a chance to get him the data in Rawatonga. He will get both flights tonight.
[15:53]	dutton_boulder	Fred-GV, will do.
[15:54]	*	jcowan_Jeffco has quit (Quit: Leaving)
[15:54]	*	vidal (c7beb621@widget.mibbit.com) has joined #GV
[15:54]	Fred-GV	dutton_boulder, Thanks, Too bad we will not see you in CC this time.
[15:54]	scw_gnd	pavel-GV Do you know... if there are airports 200-400km N of Australia suitable for close approaches? Problem is that the route from Wollongong to Honiara goes over land, not ocean, as you pointed out a while ago. .
[15:59]	*	MarkBradford-Boulder (mark@vpn21.ucar.edu) has joined #GV
[16:00]	dutton_boulder	Fred-GV, oh well, you may see Brian Vasel
[16:07]	*	ads has quit (Input/output error)
[16:09]	*	annav has quit (Quit: Leaving)
[16:09]	*	MarkBradford-Boulder has quit (Quit: Aloha)
[16:11]	pavel_GV	scw_gnd, doing missed approaches over Aus is not feasible. We planned to come back out over the ocean and resume dips, then climb as nesessary for fuel.
[16:12]	pavel_GV	scw_gnd, Aus wants to know time for every close approach in every airport. I can't seem to get through to them even with one in Woll., let alone more.
[16:13]	*	JonathanBent_NZ has quit (Ping timeout)
[16:13]	*	JonathanBent_NZ (Jonathan@67.114.124.202.static.snap.net.nz) has joined #GV
[16:19]	*	MarkZondlo (c7beb6fa@widget.mibbit.com) has joined #GV
[16:19]	pavel_GV	vanessa_nz, ETA in Lauder is 0254 UTC.
[16:23]	vidal	pavel_GV: and CHC?
[16:23]	vidal	:)
[16:24]	pavel_GV	+30 min roughly
[16:24]	*	JonathanBent_NZ has quit (Ping timeout)
[16:24]	pavel_GV	vanessa_nz, did you copy ETA?
[16:25]	*	JonathanBent_NZ (Jonathan@67.114.124.202.static.snap.net.nz) has joined #GV
[16:26]	*	bx-boston (8cf7f5f4@widget.mibbit.com) has joined #GV
[16:29]	*	MarkBradford-Boulder (mark@totoro.eol.ucar.edu) has joined #GV
[16:30]	vidal	pavel_GV: just talked to Vanessa
[16:31]	vanessa_nz	pavel_GV yes, got new Lauder ETA thanks.
[16:31]	*	MarkZondlo has quit (Quit: http://www.mibbit.com ajax IRC Client)
[16:32]	vanessa_nz	scw_gnd Steve, can you confirm you want an ozone sonde launched after the plane has gone through Lauder if the wind speed is not too high (was predicted to be strong, but currently calm)
[16:34]	*	JonathanBent_NZ has quit (Ping timeout)
[16:37]	*	JonathanBent_NZ (Jonathan@67.114.124.202.static.snap.net.nz) has joined #GV
[16:39]	*	JulieHaggerty-RAF has quit (Quit: Leaving)
[16:40]	*	MarkZondlo (Mark@166.203.191.237) has joined #GV
[16:40]	*	vidal (c7beb621@widget.mibbit.com) has left #GV
[16:42]	*	MarkZondlo has quit (Quit: Leaving)
[16:44]	*	JonathanBent_NZ has quit (Ping timeout)
[16:45]	*	cjw-mobile (cjw-mobile@166.205.131.76) has joined #GV
[16:46]	scw_gnd	vanessa_nz yes sonde, but only after we have departed, thx!
[16:46]	scw_gnd	How is sky cover at present?
[16:47]	*	cjw-mobile has quit (Quit: Colloquy for iPhone - http://colloquy.mobi)
[16:48]	scw_gnd	pavel-GV re Wollongong, if we cannot do a nice dip over Wollongong, we should not go there. Also, we should assess if we lose dips to Honiara, if so how many. Could decide not to dip there.
[16:49]	pavel_GV	scw_gnd, are you contemplating not going to Wollongong at all?
[16:49]	*	scw_gnd has quit (Quit: http://www.mibbit.com ajax IRC Client)
[16:50]	BrianC_NZ	scw_gnd sun visible through thin cloud for last half hour
[16:51]	pavel_GV	BrianC_NZ, steve dropped off and did not see your msg.

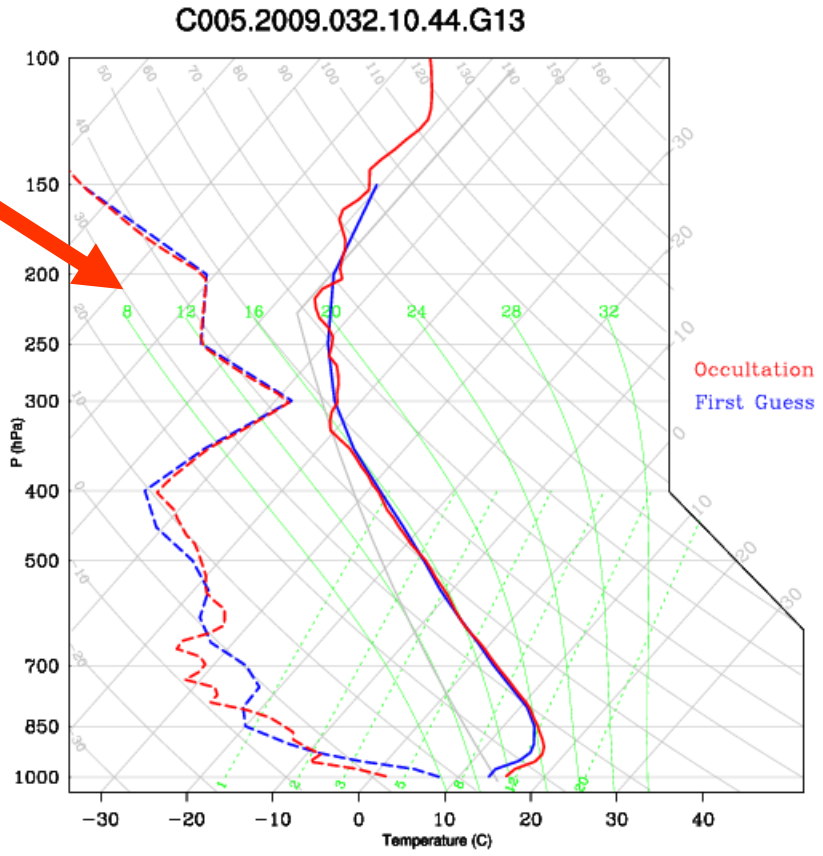
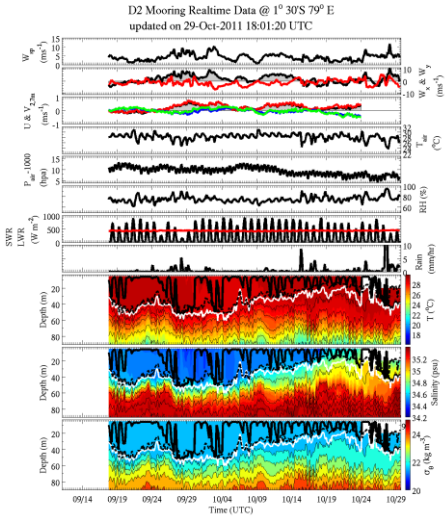
INTERACTIVE MAP FEATURE

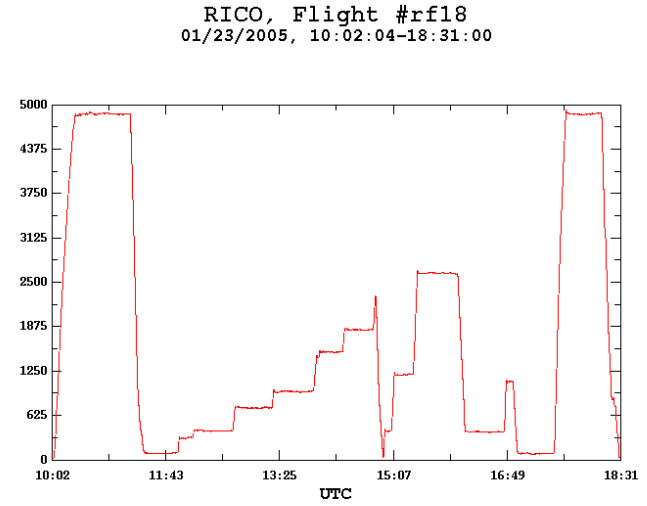


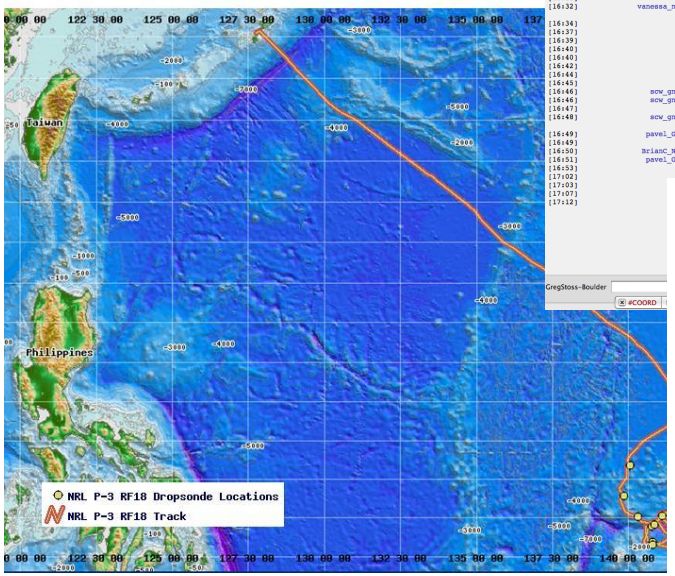
NCAR Earth Observing Laboratory

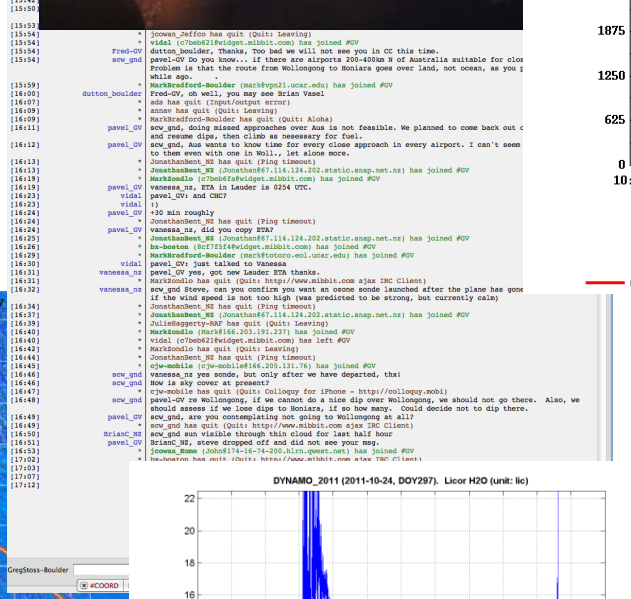
SAMPLE RESEARCH PRODUCTS

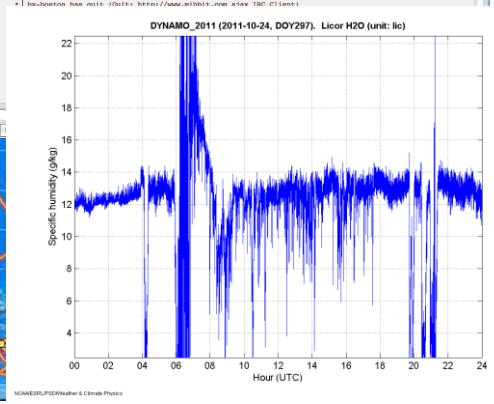


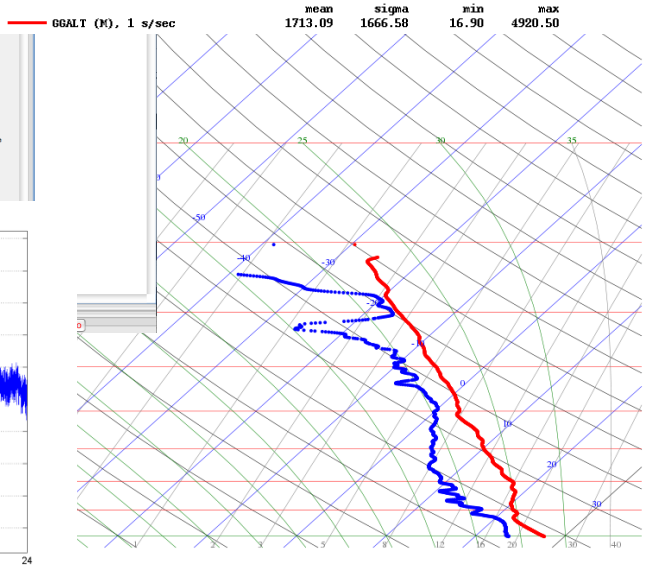
NRL P-3 RF18 Flight Track
Start of Mission: 2008/09/23 ~0000 UTC
End of Mission: 2008/09/23 ~0800 UTC











Expected Products:

1. What's needed in the field for real-time decision making?
   - On the ground
   - On the GV, MC Display
2. What needs to be captured for archival?

Operational
- Satellite Imagery
  - Geostationary
  - Polar-Orbiter
  - Winds
- Upper-air plots (Sounding SkewTs, COSMIC)
- Surface Meteorology/Oceanographic products

Model (Forecast)
- Meteorological (NCEP, Others)
- Chemical

Research
- Aircraft sensors (track, forward camera, data plots)
- Ship products

EOL
Deployment
Development
Data Services

Expected Products (cont.):

1. What's needed in the field for real-time decision making?
2. What needs to be captured for archival?

Data

- aircraft flight-level netCDF files
- kml flight tracks
- Others

Reports

- Flight Ops Plan of the Day
- Flight Mission Summary
- Daily Facility Status Summary
- Science Director Summary
- Daily Weather Discussion
- Ship Operations Summary

EOL
Deployment
Development
Data Services
