

Action Items and Wrap Up

Action Items

- Importance of proposals that address set of REx hypotheses. Proposals must review well on their own (together with the **VOCALS Summary**)
- Facility Request will be submitted to EOL by July 1st. The sampling strategy discussed at this meeting is a key component of this request. Draft by June 22nd for participant review
- VOCALS is a climate program, and a program in which modeling and observations are strongly coupled

Action Items (contd.)

- Proposal sharing? Use single set of flight plans
- Alternative hypothesis 1C to reflect potential importance of ocean biogenic production:
 - “The small effective radii measured from space over the SEP are primarily a result of anthropogenic rather than ocean biogenic sources; entrainment of polluted air from the lower free-troposphere is an important source of cloud condensation nuclei.”
- Dates for second REx Preparatory Workshop
 - Oceanography need for March or earlier
 - February? Where? Boulder, Seattle?
 - other meetings after REx?

Timeline

- **July 1st:** EOL Facility Request
- **July 15th:** Deadline for PI Proposals to be considered by VOCALS Panel Review
- **October 15th:** Review Panel Meets
- **November:** OFAP Panel Meets - feasibility
- **Fall 2007:** Site surveys (ops. center, land sites)
- **early 2007:** PI Proposal decisions
- **February 2007:** 2nd VOCALS REx Preparatory Workshop
