ASHEVILLE, N.C.

**Cover:** Thunderstorms brought heavy rains to the southeastern Plains and Mississippi Delta over the 16-day period of April 8 thro April 23. Over four inches of rain fell in many areas, and parts of west-central Missouri and Louisiana recorded up to 17 inches of r. The thunderstorms caused localized flash flooding and numerous reports of large hail , damaging winds, and tornadoes. The ra. brought beneficial moisture to areas of the southern Ohio Valley and western sections of the Southeast. However, significant rainfa failed to reach the southern Atlantic Coast where large moisture deficits continued. (*Map courtesy: Climate Analysis Center.*)

**STORM DATA**  
(ISSN 0039-1972)

National Climatic Data Center  
Editor: Grant W. Goodge

Publication Staff: William Angel, Greg Hammer, Sharon Capps, Amy Holbrooks, and Jesse Ferrell

**STORM DATA** is prepared, funded, and distributed by the National Oceanic and Atmospheric Administration (NOAA). The Outstanding Storms of the Month section is prepared by the Data Operations Branch of the National Climatic Data Center.

The Storm Data and Unusual Weather Phenomena narratives and Hurricane/Tropical Storm summaries are prepared by the National Weather Service. Monthly and annual statistics and summaries of tornado and lightning events resulting in deaths, injuries, and damage are compiled by cooperative efforts between the National Climatic Data Center and the National Severe Storms Forecast Center.

**STORM DATA** contains all confirmed information on storms available to our staff at the time of publication. However, due to difficulties inherent in the collection of this type of data, it is not all-inclusive. Late reports and corrections are printed in each edition.

Maps of the National Weather Service Forecast Zones which are used in the Storm Data and Unusual Weather Phenomena section will be printed in all editions.

Except for limited editing to correct grammatical errors, materials submitted are generally published as received.

Subscription, pricing, and ordering information is available from:

National Climatic Data Center  
151 Patton Avenue  
Asheville, NC 28801-5001  
(704) 271-4800 or (704) CLIMATE

The editor of **STORM DATA** solicits your help in acquiring photographs (prints or slides; black and white, or color), maps, clippings, etc. of significant or unusual weather events (past or present). These could be for use in the "Outstanding Storms of the Month" or "Et Cetera" sections of **STORM DATA**. We request our subscribers or other interested persons to mail such items to:

Grant W. Goodge  
National Climatic Data Center  
151 Patton Avenue  
Asheville, NC 28801-5001

Any such items received by the editor will be for use in **STORM DATA** only. Any other use will be with the permission of the owner of said items. Materials submitted will be returned if requested in the original submission.

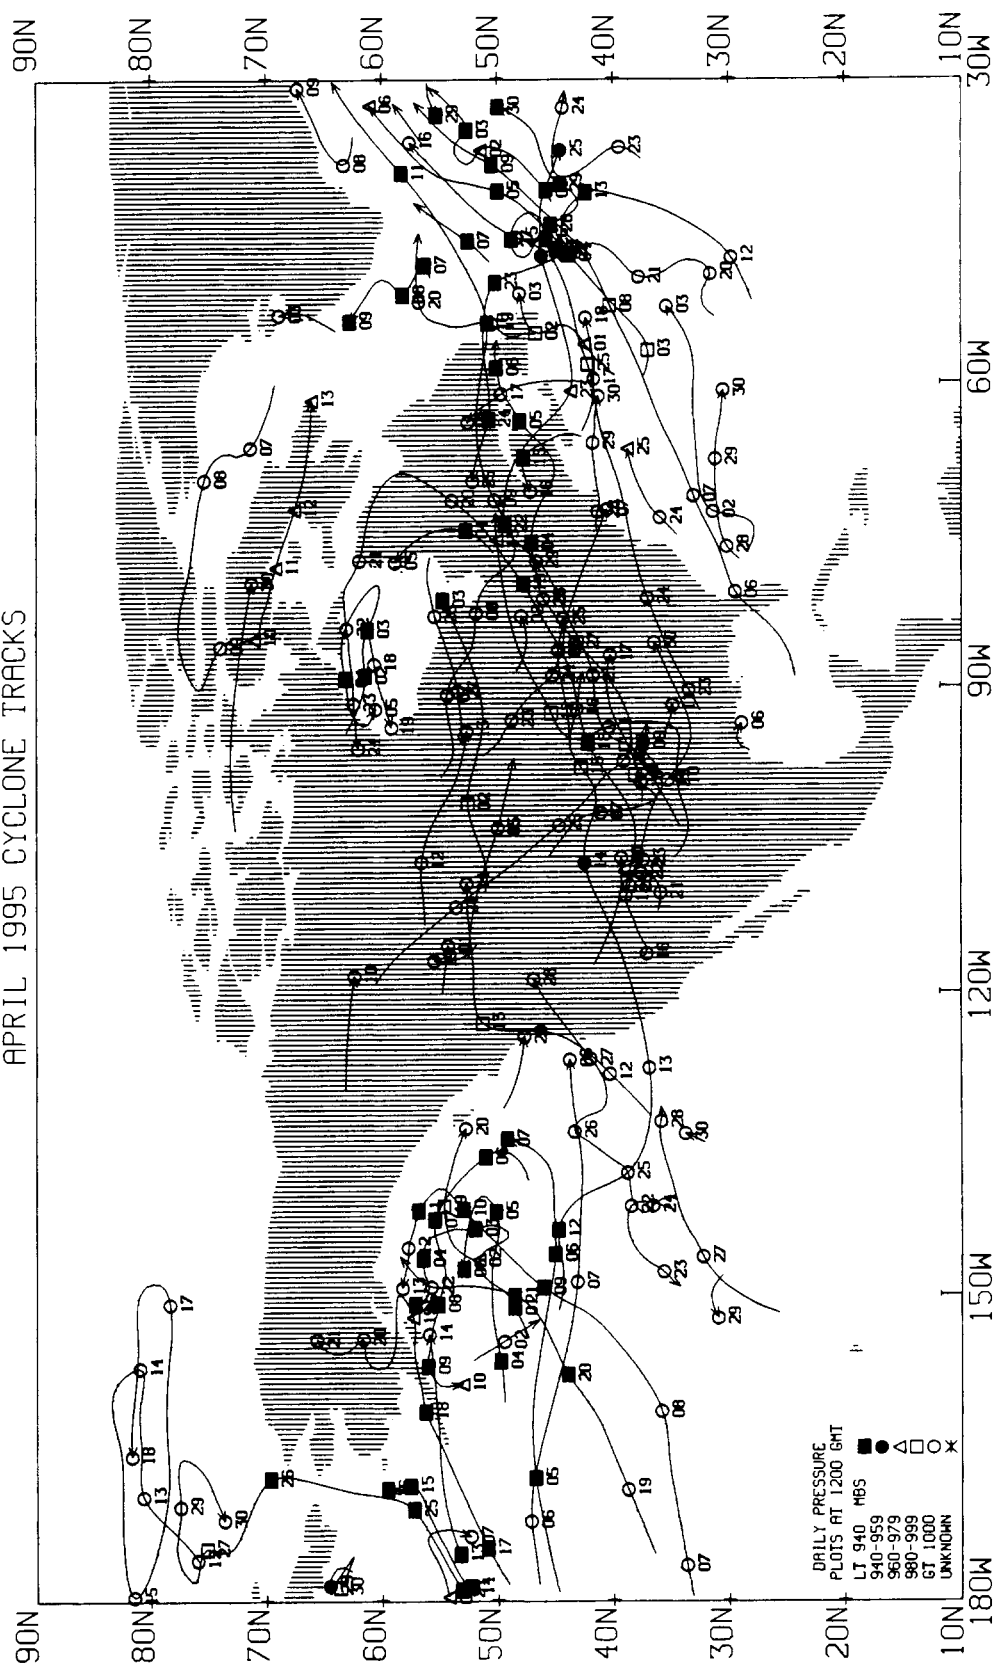

---

"I certify that this is an official publication of the National Oceanic and Atmospheric Administration and is compiled from information received at the National Climatic Data Center, Asheville, North Carolina 28801-2733."

# Storm Data and Unusual Weather Phenomena

April 1995

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed Injured		Estimated Damage Property Crops		Character of Storm
<b>ALABAMA</b>									
<b>Choctaw County Butler</b>	<b>11</b>	<b>0655CST- 0710CST</b>			<b>0</b>	<b>0</b>	<b>0.5k</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Several trees and limbs were blown down in and around the Butler area.									
<b>Washington County Chatom</b>	<b>11</b>	<b>0730CST</b>			<b>0</b>	<b>0</b>	<b>1.0k</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Several trees and power lines were blown down in the Chatom area.									
<b>Dallas County Selma</b>	<b>11</b>	<b>0850CST</b>			<b>?</b>	<b>?</b>	<b>20K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Thunderstorm winds downed a number of trees in Selma including one tree that fell on and demolished a mobile home. Heavy rains also flooded roadways.									
<b>Wilcox County Camden</b>	<b>11</b>	<b>0825CST</b>			<b>?</b>	<b>?</b>	<b>8K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Alabama Power Company reported power lines and trees down in Camden and in the Millers Ferry areas.									
<b>Autauga County Prattville</b>	<b>11</b>	<b>1000CST</b>			<b>?</b>	<b>?</b>	<b>35K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Strong winds with a thunderstorm downed trees and damaged several buildings in Prattville. The swath of damage ran from about Autauga Creek near Prattville City Hall to the Prattville Primary School on Wetumpka Street. Other reports of damage came from the east side of Prattville near the K-Mart Shopping Center. Damage seemed to be confined to a four or five block radius according to Prattville police. Power was out to the downtown area of Prattville for several hours. Roofs of several downtown homes and businesses were reported damaged.									
<b>Shelby County 6 SE Shelby</b>	<b>11</b>	<b>1005CST</b>			<b>?</b>	<b>?</b>	<b>22K</b>	<b>0</b>	<b>Thunderstorm Winds (G60)</b>
A mobile home was completely deroofed and two other mobile homes were damaged in extreme southeast Shelby County about six miles southeast of Shelby. There were no injuries. Based on a storm survey and reports witnesses, it was most likely a straight-line wind event.									
<b>Elmore County 3 WSW Elmore</b>	<b>11</b>	<b>1015CST</b>	<b>4.0</b>	<b>100</b>	<b>0</b>	<b>0</b>	<b>25K</b>	<b>0</b>	<b>Tornado (F1)</b>
What appeared to be a small tornado damaged a section of Elmore County from Millbrook to Elmore in the western part of the county. The area affected paralleled Highway 14. Aluminum skirting was ripped off about 20 mobile homes at one mobile home park, and numerous trees and power lines were downed in the area.									
<b>Lauderdale County 4 N Florence</b>	<b>11</b>	<b>1100CST</b>			<b>?</b>	<b>?</b>	<b>8K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Winds with a thunderstorm tore off a portion of the roof at the Underwood School in Petersville. The storm blew away the tar-and-gravel roof covering four classrooms in the school's annex. A large light fixture fell from the ceiling in one room and ceiling tiles fell in another classroom. The students were not in the classrooms affected when the winds struck.									
<b>St. Clair County Pell City</b>	<b>11</b>	<b>1110CST</b>			<b>?</b>	<b>?</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>
Numerous large tree limbs were reported down in Pell City.									
<b>Tallapoosa County 7 SSW Dadeville</b>	<b>11</b>	<b>1130CST</b>			<b>?</b>	<b>1</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>
An employee of the Still Waters Resort on Lake Martin was injured when the top of a tree was broken off by strong wind. The broken portion of the tree landed where two or three employees were standing. One employee was struck in the head by the falling tree and required hospitalization. Several other trees in the area were blown down by the wind, but no property damage was reported.

### Chambers County Lanett

11	1200CST	1.5	200	0	0	42K	0	Tornado (F0)
----	---------	-----	-----	---	---	-----	---	--------------

A weak tornado downed numerous trees and damaged four houses in the Lakeview area near Lanett in Chambers County. An eyewitness reported seeing a funnel cloud bobbing up and down from the sky producing an intermittent track of damage. Damage was reported to be minor to the four houses.

### Etowah County Rainbow City Reece City

11	1200CST				?	?	?	Thunderstorm Winds
11	1210CST				?	?	?	Thunderstorm Winds

Several trees were reported blown down in Reece City and Rainbow City. A downed tree also interrupted cable television service in Rainbow City.

### Madison County Huntsville

11	1230CST				?	?	50K	0	Thunderstorm Winds
----	---------	--	--	--	---	---	-----	---	--------------------

Strong wind severely damaged a large section of the Bethco manufacturing facility on Dug Hill Road. No injuries were reported among the 80 employees working in the building at the time of the damage.

### Randolph County Big Springs

11	1240CST				?	?	?	?	Thunderstorm Winds
----	---------	--	--	--	---	---	---	---	--------------------

The sheriff's department reported trees down in Big Springs in the eastern part of the county.

### Choctaw County 6 NW Butler

11	1500CST				0	0	0	0	Hail (1.75)
----	---------	--	--	--	---	---	---	---	-------------

Golf ball-size hail was reported six miles northwest of Butler.

### Tuscaloosa County Tuscaloosa

11	1543CST				?	?	?	?	Hail (0.88)
----	---------	--	--	--	---	---	---	---	-------------

Nickel-size hail was reported by a television station.

### Jefferson County Birmingham Grayson Valley Trussville

11	1635CST				?	?	?	?	Hail (0.88)
11	1655CST				?	?	?	?	Hail (0.75)
11	1704CST				?	?	?	?	Hail (0.75)

Nickel-size hail was reported at the Birmingham fairgrounds.

### St. Clair County Argo Odenville

11	1712CST				?	?	?	?	Hail (0.75)
11	1717CST				?	?	?	?	Hail (0.88)

Dime-size hail was reported at Argo and nickel-size hail was reported at Odenville.

### Baldwin County Gulf Shores

11	1924CST				0	0	0	0	Hail (0.75)
----	---------	--	--	--	---	---	---	---	-------------

Dime-size hail was reported in Gulf Shores.

### Gulf Shores

11	1945CST				0	0	1.0k	0	Hail (0.88)
----	---------	--	--	--	---	---	------	---	-------------

Nickel-size hail was reported north of Gulf Shores. Some automobile windshields were damaged from the hail.

### Conecuh County Evergreen

11	2055CST				0	0	0	0	Hail (0.75)
----	---------	--	--	--	---	---	---	---	-------------

Dime-size hail was reported just west of Evergreen.

### Lyeffion

11	2102CST				0	0	0	0	Hail (1.75)
----	---------	--	--	--	---	---	---	---	-------------

Golf ball-size hail was reported near Lyeffion.

# Storm Data and Unusual Weather Phenomena

April 1995

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage		Character of Storm
					Killed	Injured	Property	Crops	
<b>3 SSE Moulton</b>	<b>20</b>	<b>1615CST</b>			?	?	?	?	<b>Hail (0.75)</b>
Emergency management reported three-quarter inch hail one mile east of Wren.									
<b>Franklin County Hodges</b>	<b>20</b>	<b>1815CST</b>			?	?	?	?	<b>Hail</b>
Three-quarter inch hail was reported by an amateur radio operator at Hodges in south-central Franklin County.									
<b>Lamar County 6 SW Vernon</b>	<b>20</b>	<b>1903CST</b>	<b>4.0</b>	<b>80</b>	<b>0</b>	<b>6</b>	<b>.65M</b>	<b>0</b>	<b>Tornado (F1)</b>
A tornado began about six miles southwest of Vernon just north of the location where County 9 crosses the Yellow Creek. The tornado moved north directly toward Vernon, but lifted about two miles southwest of the center of town.									
<b>Franklin County Phil Campbell 6 ENE Russellville</b>	<b>20</b>	<b>1905CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
	<b>20</b>	<b>1940CST</b>			?	?	<b>25K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
Trees and power lines were reported down due to strong wind in Phil Campbell in the southeast part of Franklin County.									
A mobile home located at Tharptown in northeast Franklin County about six miles east-northeast of Russellville was destroyed by wind.									
<b>Fayette County 13 N Fayette</b>	<b>20</b>	<b>1921CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
Fayette County Sheriff's Department reported trees down in the northern part of Fayette County in and around the Wayside area.									
<b>Colbert County 3 S Tuscumbia</b>	<b>20</b>	<b>1931CST</b>			?	?	?	?	<b>Funnel Cloud</b>
Emergency management reported that storm spotters observed a funnel cloud in the White Oaks Community and south of Tuscumbia.									
<b>Lawrence County Hatton Wheeler</b>	<b>20</b>	<b>1947CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
	<b>20</b>	<b>1947CST</b>			?	?	?	?	<b>Thunderstorm Winds (G60)</b>
Emergency management reported large trees blown down at Hatton and 60 mph wind at Wheeler.									
<b>Lauderdale County Wheeler Dam Anderson</b>	<b>20</b>	<b>1947CST</b>			?	?	?	?	<b>Thunderstorm Winds (G60)</b>
	<b>20</b>	<b>2007CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
A 60 mph wind was reported at Wheeler Dam. Large trees were reported down at Anderson.									
<b>Marion County 14 E Hamilton</b>	<b>20</b>	<b>1948CST</b>			?	?	<b>15K</b>	<b>0</b>	<b>Thunderstorm Winds (G60)</b>
Numerous trees were downed and a mobile home was severely damaged by a downburst wind. The damage path began on the south side of U.S. 278 at the intersection with State Highway 129 near a community called Hales and extended northward for about a mile.									
<b>Marion County Winston County 5 SW Haleyville Haleyville</b>	<b>20</b>	<b>1954CST</b>	<b>6.0</b>	<b>120</b>	<b>0</b>	<b>17</b>	<b>.45M</b>	<b>0</b>	<b>Tornado (F1)</b>
	<b>20</b>	<b>2011CST</b>			?	?	?	?	<b>Hail (1.00)</b>
A tornado touched down about five miles southwest of Haleyville in Marion County along State Highway 129 and moved on a northeast track that took it into the northern section of Haleyville. The tornado path covered about five miles in Marion County and one mile in Winston County. The most significant damage occurred along State Highway 129 in Marion County and most of the									

## ALABAMA Cont'd

injuries occurred in that area. Most of those injured were in mobile homes at the time the storm hit. Three mobile homes were destroyed along with three businesses. Large hail, around one inch, was

					Killed	Injured	Property	Crops	
									also reported in Haleyville with the storm.
<b>Pickens County Reform</b>	<b>20</b>	<b>2020CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Trees and power lines were reported down in Reform and in the area of the county just north of Reform when a thunderstorm moved through.
<b>Colbert County Lawrence County</b>	<b>20</b>	<b>2022CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Amateur radio storm spotter reported several large trees blown down on the Colbert-Lawrence county line.
<b>Fayette County 3 E Fayette</b>	<b>20</b>	<b>2030CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Thunderstorm winds downed trees east of Fayette along County Road 35 in the Cloverdale subdivision.
<b>Limestone County Athens</b>	<b>20</b>	<b>2100CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Emergency management reported several large trees blown over in the city of Athens.
<b>Lawrence County Mount Hope</b>	<b>20</b>	<b>2115CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Amateur radio operator reported a large tree blown over at Mount Hope in western Lawrence County.
<b>Fayette County Fayette</b>	<b>20</b>	<b>2145CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Fayette police reported several trees blown down in Fayette.
<b>Tuscaloosa County Tuscaloosa</b>	<b>20</b>	<b>2200CST</b>			?	?	?	?	<b>Thunderstorm Winds (G52)</b>
									A television station in Tuscaloosa reported 60 mph winds with a thunderstorm. Numerous trees and power lines were downed across the city according to emergency management office.
<b>Hale County</b>	<b>20</b>	<b>2218CST</b>			?	?	?	?	<b>Thunderstorm Winds</b>
									Trees were downed in scattered areas across the county during a thunderstorm. No specific property damage was reported.
<b>Jefferson County Birmingham</b>	<b>20</b>	<b>2245CST</b>			?	?	<b>10K</b>	<b>0</b>	<b>Thunderstorm Winds (G60)</b>
<b>Fairfield</b>	<b>20</b>	<b>2245CST</b>			?	?	<b>65K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
<b>Irondale</b>	<b>20</b>	<b>2255CST</b>			?	?	<b>35K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
									A wind gust to 60 mph was reported by a television station located on Red Mountain overlooking downtown Birmingham. The local emergency management office reported trees and power lines down around the city and county. In Irondale, the roof was blown off an electronics store. In Fairfield, numerous buildings sustained minor damage in the Fairfield Heights and Rutledge Hills areas. Glass doors were blown out and skylights were damaged at Western Hills Mall. A tree reportedly fell on a car in Ketona and the occupant was briefly trapped. Alabama Power reported 38,400 people were without power at one point. In Ensley, a man died in a house fire that apparently started when candles were used while the electricity was out. In the Leeds area, a woman was briefly trapped in her house when a tree fell on it.
<b>Choctaw County Yantley</b>	<b>20</b>	<b>2300CST</b>			<b>0</b>	<b>0</b>	<b>2k</b>	<b>0</b>	<b>Thunderstorm Winds</b>

									A small high pressure system was located across eastern Arkansas early on the 11th. Meanwhile, a small low pressure system developed across south-central Arkansas around the same time. As both these system moved northeastward, the pressure gradient between the two resulted in high winds over portions of central and eastern Arkansas. Winds gusted to between 60 and 70 mph at a number of locations. Numerous trees and power lines were blown down. A number of buildings and vehicles were also damaged by falling trees. Two people in North Little Rock were slightly injured when a tree fell on a section of their house they were in. Thousands of people experienced power outages.

Severe thunderstorms moved across northwest Arkansas during the late evening of April 17th into the very early morning of April 18th. The storms produced large hail, damaging winds, and 1 tornado. The tornado touched down 5 miles northeast of Evansville near the top of Starlight Mountain at 2313CST. This F-1 tornado damaged 1 home and destroyed 2 chicken houses along its 1/2 mile length and 75 yard width.

Strong thunderstorm winds damaged several buildings in Rogers, including blowing the roof off the National Guard Armory Building. Several large trees were also downed in Rogers. A tree was blown onto a house near Elm Springs, and a large tree was blown onto a trailer in Siloam Springs. Some chicken houses were blown down in Morrow, and numerous trees and power lines were blown down near Cave Springs. Strong thunderstorm winds downed several trees 3 miles north of Spring Valley, and several large tree limbs were blown down in Huntsville and 3 miles north of Carrollton. Thunderstorm winds gusted to 60 miles an hour 7 miles south of Prairie Grove and 4 miles west of Greenwood, and dime size hail fell at Maysville.

Severe thunderstorms moved across northwest Arkansas during the evening of April 19th. Thunderstorm winds estimated at 100 miles an hour destroyed 1 mobile home and 2 poultry barns 1.5 miles northwest of Gentry, and mobile homes were damaged and trees were blown down by strong thunderstorm winds 4 miles west of Gentry. Numerous trees were blown down in Gentry by 65 mile an hour winds, and several houses in Gentry received major roof damage. Strong thunderstorm winds blew a tree down onto a house in Pea Ridge, and blew down a power line 6 miles north of Eureka Springs. Dime size hail fell at several locations in northwest Arkansas, and 1 man was injured in Centerton when he was struck by lightning.

Snowfall up to 12 inches was reported at Firstview, nine inches at Arapahoe, eight inches at Cheyenne Wells, and seven inches at Kit Carson.

## COLORADO, Western

**Logan County Sterling 15 W**

**08 1845MST**      **0 0 0 0 Dry Microburst Winds**

Microburst winds of unknown speed blew over some steel dumpsters and a few large cement tables at North Sterling Reservoir Park. Some trees in the vicinity of the park were damaged.

**COZ009-013-016-018 034>036-039>041 066>081**

**09 0300MST-10 2200MST**      **0 0 0 0 Heavy Snow**

**Front Range, Central, Southern Mountains, Eastern Plains**

A strong spring storm brought periods of heavy snow to most of the Colorado high country and eastern Front Range locations. A long duration of heavy, upslope snow fell on the areas of Monument Ridge through Colorado Springs and Pueblo southward to the New Mexico border in the Sangre de Cristos. Monument Hill totaled around 22 inches in some areas with the Colorado Springs area receiving between 4 to 12 inches. Around 16 inches fell in the Pueblo vicinity with the Wet Mountains, southern Sangre de Cristos and eastern portions of the San Juan Mountains collecting between 12 and 28 inches. The Southeast Plains received heavy snow as the low pressure system pulled out into the Central Plains of the United States. Five to six inch accumulations were common from the

## COLORADO, Western Cont'd

southern Front Range eastward to the Kansas border. Locations in the foothills west of Denver ranged between 8 and 16 inches. Honors for the heaviest snow went to Cuchara with 28 inches, followed by Beulah and Rye with 17 to 24 inches. A 166 mile stretch of Interstate 70, from Watkins eastward to Goodland, KS, was closed for several hours due to drifting snow and near whiteout conditions.

**COZ033-034-036 Northern, Central Mountains**

**11 0700MST-2000MST**      **0 0 0 0 High Winds 66**

High winds developed over portions of the northern and central mountains behind an exiting storm

system. Winds gusting to as high as 66 knots were recorded at Keystone Ski area and a top Squaw Mountain five miles south of Idaho Springs.

<b>COZ018-034&gt;48-050 066&gt;075-092</b>	<b>14</b>	<b>0500MST- 2000MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>High Winds 82</b>
--	-----------	-----------------------------	--	--	----------	----------	----------	----------	----------------------

**Northern, Central  
Southern Mountains,  
Eastern Foothills,  
Front Range,  
Eastern Plains**

Strong winds developed during the early morning hours over the eastern and southern sections of the state. The strongest winds were focused over the Southern Mountains with the highest gust recorded at 82 knots (94 mph) at Red Mountains Pass in the San Juan Mountains. A 35,000 pound tractor-semitrailer was blown on its side on La Veta Pass in the Sangre de Cristo Mountains. Most gusts in the high country and foothills ranged between 60 and 80 knots. On the Front Range and Eastern Plains, winds gusted between 45 and 60 knots except for Fort Morgan which received a gust to 68 knots. Several trees and power lines were blown down in the Greeley and Fort Morgan areas keeping residents powerless for a few hours. A 70 knot winds gust was recorded at Liberty Point (Pueblo 8 W). Damaging winds were also noted near Limon as numerous road signs had been destroyed in the vicinity. Several trees in Limon sustained damage. In Cheyenne Wells, high winds tore the roof off a large shed and partially damaged the siding.

<b>COZ005-009-010-012 013-016-018-033&gt;036 039-040-070-071- 073&gt;080-090&gt;092</b>	<b>16 19</b>	<b>1700MST- 1800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>
---	------------------	-----------------------------	--	--	----------	----------	----------	----------	-------------------

**Northern, Central  
Southern Mountains,  
Eastern Foothills,  
Front Range,  
Eastern Plains**

The second healthy spring storm system of the month moved over Colorado. Upslope flow and strong dynamics generated heavy, convective type snow in all Colorado mountains beginning on the evening of the 16th. Snowfall rates near the onset of the snow were at two to three inches per hour in the Central Mountains. Interstate 70 was closed for a few hours between Vail Pass and Georgetown due to a multi-car pile-up. Visibilities had been reduced down to only a few feet in blowing, heavy snow. Most mountain locations received between 8 and 16 inches. Buena Vista and Irwin had the highest amounts with 18 inches each. The upslope flow along with areas of thundersnow dropped 6 to 12 inches in the foothills from Boulder County, southward to Pueblo County. Convective snow produced a quick two to five inches across the Eastern Plains on the afternoon of the 17th. Higher amounts were reported under the heavier snow bands.

<b>COZ033&gt;035-066&gt;081</b>	<b>21 23</b>	<b>0100MST- 1200MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>
---------------------------------	------------------	-----------------------------	--	--	----------	----------	----------	----------	-------------------

**Northern, Central,  
Southern Mountains,  
Southern Foothills,  
Southeast Plains**

A third in a series of moist, spring storm systems trekked over Colorado mainly affecting the Southern and Central Mountains, Southeastern Plains, and the Southern Foothills. The storm dropped between 4 to 12 inches over the Southeast Plains with 12 to 15 inches in the Central, Southern Mountains, and Southern Foothills.

<b>Jefferson County SW Littleton</b>	<b>22</b>	<b>0745MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Funnel Cloud</b>
--	-----------	----------------	--	--	----------	----------	----------	----------	---------------------

A probable cold air funnel was sighted by two spotters one mile north of Chatfield Reservoir in southern Jefferson County.

<b>COZ010-015-034&gt;36 039-040-043</b>	<b>25 26</b>	<b>1800MST- 2200MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>
---	------------------	-----------------------------	--	--	----------	----------	----------	----------	-------------------

**Northern, Central  
Mountains, Northern  
Front Range,  
Northeastern Plains  
COLORADO, Western Cont'd**

More snow was added to the much above normal snow pack in the high country. Locations in the Northern and Central Mountains received between 10 and 16 inches of snow. Breckenridge and Aspen Ski Resorts each collected 16 inches.

Six to twelve inches of heavy wet snow fell along the Front Range Urban Corridor with the greatest amounts above 6000 feet. Boulder and Golden had the highest amounts in the northern Front Range with 10 inches each. Wet snow caused a power pole to snap in Greeley leaving an estimated 4,000 residents without power for four hours.

<b>Adams County Denver 15 NE</b>	<b>30</b>	<b>1625MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Hail (0.75)</b>
--------------------------------------	-----------	----------------	--	--	----------	----------	----------	----------	--------------------

Hail, up to three-quarters-inch fell over Denver International Airport. The hail, which was reported as soft, lasted 8 to 10 minutes with no damage sustained.

---------------------------------------	----	---------	--	--	---	---	---	---	---------------------------

Power lines were knocked down.

<b>Litchfield County New Milford</b>	04	1250EST			0	0	?	0	<b>Thunderstorm Winds</b>
<b>Goshen</b>	04	1254EST-			0	0	?	0	<b>Thunderstorm Winds</b>
<b>Sharon</b>	04	1255EST			0	0	?	0	<b>Thunderstorm Winds</b>

Power lines were knocked down in Goshen at 1254 EST. Poles and lines were downed in Sharon at 1255 EST.

<b>Norfolk Plymouth</b>	04	1300EST			0	0	?	0	<b>Hail (0.75)</b>
	04	1300EST			0	0	?	0	<b>Thunderstorm Winds</b>

Trees and power lines were reported blown down. A fast moving squall line preceding a strong Arctic cold front produced strong to severe thunderstorms with wind gusts to 40 to 60 mph. Some locations experienced gusts in excess of 60 or 70 mph. Up to 87,000 electric customers lost power statewide as numerous trees and tree limbs fell and brought down power lines.

<b>Fairfield County</b>	04	1310EST			0	0	?	0	<b>Thunderstorm Winds</b>
-------------------------	----	---------	--	--	---	---	---	---	---------------------------

<b>New Haven County Wolcott</b>	04	1310EST			0	0	?	0	<b>Thunderstorm Winds (G63)</b>
-------------------------------------	----	---------	--	--	---	---	---	---	---------------------------------

A roof was reported blown off a building.

<b>Hartford County Southington</b>	04	1310EST			0	0	?	0	<b>Thunderstorm Winds</b>
--	----	---------	--	--	---	---	---	---	---------------------------

Wind gusts to 56 mph was recorded and considerable wind damage was reported.

<b>Hartford County Bloomfield</b>	04	1315EST			0	0	?	0	<b>Thunderstorm Winds (G64)</b>
---------------------------------------	----	---------	--	--	---	---	---	---	---------------------------------

Five pine trees one foot in diameter were blown down. A TV meteorologist recorded a wind gust to 74 mph.

<b>Litchfield County Watertown</b>	04	1315EST			0	0	?	0	<b>Thunderstorm Winds</b>
--	----	---------	--	--	---	---	---	---	---------------------------

Trees and tree limbs were blown down and several roads were closed.

<b>New Haven County Naugatuck</b>	04	1320EST			0	0	25.0K	0	<b>Thunderstorm Winds</b>
---------------------------------------	----	---------	--	--	---	---	-------	---	---------------------------

A roof was blown off one house and two others were damaged.

<b>Fairfield County Shelton</b>	04	1322EST			0	0	25.0K	0	<b>Thunderstorm Winds</b>
-------------------------------------	----	---------	--	--	---	---	-------	---	---------------------------

A 20 x 30 foot section of a school gymnasium roof was torn off. Numerous trees were reported blown down.

<b>Hartford County Windsor Locks</b>	04	1324EST			0	0	?	0	<b>Thunderstorm Winds (G52)</b>
--	----	---------	--	--	---	---	---	---	---------------------------------

## CONNECTICUT, Northeastern Cont'd

The National Weather Service at Bradley International Airport reported a peak wind gusts to 60 mph.

<b>Fairfield County Bridgeport Stamford</b>	04	1330EST			0	1	?	0	<b>Thunderstorm Winds (G55)</b>
---	----	---------	--	--	---	---	---	---	---------------------------------

The National Weather Service in Bridgeport recorded a peak wind gust to 63 mph. In Stamford, a driver was injured when a tree fell on her car.

<b>Hartford County Hartford</b>

<b>Much of Iowa</b>	<p>A strong arctic cold front dropped south across Iowa during the afternoon and evening hours. Winds aloft were very strong and these strong winds mixed downward as the atmosphere became adiabatic. In addition, a line of light showers developed just behind the cold front in the arctic air. The combination of the dry lapse rate and dry atmospheric conditions in the lower levels resulted in several dry microbursts, which contributed to the high winds. This arctic outbreak was the strongest of the season. Strong winds began over the northwest corner of the state during the early afternoon hours. The winds quickly swept southeast across Iowa during the late afternoon and early evening hours. Winds of 60 to 70 mph downed power lines in northeast Iowa in Clayton County. Other spotty damage was reported around the state, but much of it was limited to tree limbs. Fortunately, the leaves were not yet on the trees. Some other strong wind gusts reported include 69 mph at nearby La Crosse, 68 mph at the Mason City Airport, 52 mph at Ottumwa and Clarion, and 51 mph at Estherville. There were numerous reports of winds near 50 mph such as a 48 mph gust at Waterloo, and 47 mph at Dubuque. Winds were sustained in the 25 to 40 mph range for several hours at most locations. Visibility was reduced due to blowing dust at times as well.</p>								
<b>Cass County</b>	<b>07</b>	<b>1525CST</b>			<b>0</b>	<b>0</b>	<b>5K</b>	<b>0</b>	<b>Hail (1.00)</b>
<b>1 S Griswold</b>									
<b>Lee County</b>	<b>07</b>	<b>1920CST</b>			<b>0</b>	<b>0</b>	<b>1K</b>	<b>0</b>	<b>Hail (0.75)</b>
<b>1 N Keokuk</b>									
<p>A warm front extended from low pressure over eastern Nebraska, across southern Iowa. During the day, moisture streamed north from the Gulf of Mexico and interacted with the front during the late afternoon and evening hours. At the same time, a weak upper level system passed across the state. Temperatures just south of the front warmed into the lower 70s with dew point temperatures approaching 60 degrees. Due to the cold ambient temperatures aloft, convective available potential energy values (CAPE) were just over 3300 J·kg<sup>-1</sup> over southwest Iowa. Strong shear, both directional and speed, was evident in the profile. Helicity values were just over 350 m<sup>2</sup>·s<sup>-2</sup> as well.</p>									
<b>IOWA, Central</b>									
<p>Thunderstorms developed during the middle and later afternoon hours. The main severe weather feature was hail. There were no reports of high winds with the storms. Hail was up to golf ball-size just to the west of Iowa before they moved into the state. One-inch-diameter hail was reported in Cass County as the storms moved over. There were many reports of pea- to marble-size hail across the southwest quarter of the state. Marble-size hail covered the ground near Lenox, in Taylor County. The storms weakened just before sunset. WSR-88D VIL (vertically integrated liquid) values were quite low with this event. The highest were in the 55 kg·m<sup>-2</sup> range, though values in the 45 kg·m<sup>-2</sup> range did produce dime-size hail. During the early evening hours, the storms strengthened again over southeast Iowa as the low level jet strengthened. The jet interacted with an old outflow boundary left from the convection over north-central and central Iowa several hours prior. Three-quarter-inch-diameter hail clipped the southeast corner of the state near Keokuk, in Lee County.</p>

A strong frontal system extended west-northwest to east-southeast just south of Iowa. Temperatures to the north of the front were in the 40s and 50s, while to the south temperatures were in the upper 70s to middle 80s with surface dew point readings around 60 degrees. The air mass became very unstable by the late afternoon hours. Thunderstorms erupted rapidly over southwest Iowa during the early evening hours. The air feeding into the system had total totals of 62 ° C, and a lifted index of -6 ° C. Analysis of the sounding from Topeka, Kansas, revealed a CAPE value of over 2650 J·kg<sup>-1</sup>. The main severe weather feature with the storms was again hail. The freezing level was around 10,500 feet MSL, as was the case the previous day. Most of the hail was anywhere from marble-size up to an inch in diameter. There were numerous reports of hail completely covering the ground. WSR-88D VIL values on the stronger hail producing storms were over 65 kg·m<sup>-2</sup>, though most storms that approached 50 kg·m<sup>-2</sup> were severe. Though the dynamics were strong and mesocyclone signatures were observed by the WSR-88D, there were very few reports of significant winds as the signatures were in the upper mid levels of the atmosphere. High winds did occur east of Greenfield in Adair County. The winds destroyed out buildings and threw debris across a field there. The case was clearly a case of elevated convection. As the storms tracked east, larger hail fell from one of the storms just east of Des Moines in Jasper County. One and one-half-inch-diameter hail covered the ground at Prairie City. Winds became quite strong near Reasnor, gusting to around 50 mph as the storms passed. The storms did produce very heavy rainfall. Since the ground was not saturated, flooding was limited to local ponding in most cases. A few counties over east-central Iowa had minor urban flooding, however no real significant damage occurred. Some hail fell with the storms as well in Scott County. Most of it was marble-size, however dime-size hail fell south of Mount Joy.

<b>Howard County</b>									
<b>Cresco</b>	<b>09</b>	<b>2030CST</b>			<b>0</b>	<b>0</b>	<b>3K</b>	<b>0</b>	<b>Thunderstorm Winds (G50)</b>

## IOWA, Central Cont'd

Scattered thunderstorms moved across northern Iowa during the evening hours. There were numerous reports of pea- to marble-size hail with them, covering the ground in some locations. The gradient winds were quite strong during the evening. Minor damage occurred in Cresco as one storm produced winds of 58 mph.

west-south of Iowa. A strong southerly flow of very unstable air rode over the top of the arctic air mass. Due to the strong gradient and directional shear, helicity values just prior to the thunderstorm development were as high as  $1175 \text{ m}^2\text{-s}^{-2}$  in the surface to three km layer. Thunderstorms erupted rapidly during the late evening hours and quickly became severe. Hail was the main severe weather feature with the storms. Although most were just below severe criteria as they crossed from Missouri into Iowa, many areas reported a hail accumulation of up to an inch of pea- to marble-size hail. A few storms were severe over southeast and east-central Iowa. Golf ball-size hail pelted Lee County west of Fort Madison, with dime-size hail extending northeast into the Quad-Cities area. Golf ball-size hail was also reported in the western part of the city of Burlington. Considerable damage was done as the storm passed over a car dealership. Six hundred twenty cars were damaged by the hail. Strong winds accompanied the storms in Dixon, causing minor damage. High winds toppled a light pole and caused some minor damage in Clinton County at Clinton. Damage was also reported in Cedar County at Tipton when thunderstorm winds tore part of a roof off a hardware store in town. In Jefferson County, lightning struck a propane tank in Fairfield. The tank was set on fire and some damage was also reported in the house.

<b>IAZ004&gt;007-015&gt;017-023&gt;028-033&gt;039-044&gt;050-057&gt;061-070&gt;073-081-082</b>	<b>10</b>	<b>0600CST-1200CST</b>			<b>0</b>	<b>0</b>	<b>50K</b>	<b>0</b>	<b>Freezing Rain</b>
--	-----------	------------------------	--	--	----------	----------	------------	----------	----------------------

**Northwest two thirds of Iowa**

A strong storm system began to lift out of the southwest United States. Warm, moist, and unstable air was lifted north over the top of an arctic air mass in place over Iowa. A "cold conveyor" became set up over Iowa as east to northeast winds fed cold dry air into the state in the lower levels. A large area of precipitation broke out over the state. Temperatures were at or below freezing over the northwest two-thirds of Iowa. A widespread freezing rain event occurred as the rain continued. In areas of heavier precipitation, the freezing rain changed over to ice pellets. Thunder also accompanied many of the heavier showers. The ground temperatures were relatively warm, thus this storm did not present a major travel problem. There were numerous accidents reported, however, roadways were generally slushy as opposed to ice covered. Winds during this event were quite strong, in the 20 to 40 mph range. Ice accumulated on trees and power lines. The combination of ice loading and the high winds caused many branches to fall, knocking out power for some. There were a few reports of trees being toppled, but those reports were isolated.

<b>IAZ004&gt;006-015-048&gt;050-061&gt;064-074&gt;078-082&gt;089-094&gt;099</b>	<b>10</b>	<b>0900CST-0600CST</b>			<b>0</b>	<b>0</b>	<b>10K</b>	<b>0</b>	<b>Flooding</b>
---	-----------	------------------------	--	--	----------	----------	------------	----------	-----------------

**Much of central and southeast Iowa**

Preliminary information provided by the State Climatologist Harry Hillaker, Iowa Department of Agriculture and Land Stewardship, indicated statewide rainfall averaged 4.90 inches during April

**IOWA, Central Cont'd**

1995. This figure is 155 percent of the normal of 3.16 inches and made the month of April the 8th wettest in Iowa during the last 123 years. Precipitation received during the month came mainly during three time periods. They were the 10th, 18th, and the 26th. Soil conditions were saturated at the time and most of the rainfall quickly flowed into the rivers. During the rainfall of the 10th, minor flooding was observed along the Des Moines, Chariton, Skunk, and Iowa River Basins. The flooding was quite minor and mostly restricted to agricultural lands. River crests were generally a foot or less above the flood stage.

<b>Decatur County Lamoni Airport</b>	<b>10</b>	<b>0905CST</b>			<b>0</b>	<b>0</b>	<b>10K</b>	<b>0</b>	<b>Hail (1.75)</b>
<b>Jasper County Newton</b>	<b>10</b>	<b>0925CST</b>			<b>0</b>	<b>0</b>	<b>200K</b>	<b>0</b>	<b>Lightning</b>

The same storm system mentioned above produced widespread thunderstorm activity across the central United States. What was actually a mesoscale convective system moved across Iowa during the morning hours. One of the stronger storms produced golf ball-size hail as it passed over the airport at Lamoni. As the storms passed over Jasper County, lightning struck a barn on a farmstead. The barn was set on fire along with two other sheds. Damage to the buildings and equipment was placed at \$200,000.

## Much of Iowa

An intense low pressure area developed over the Texas and Oklahoma Panhandle area during the night of the 17th. The low tracked northeast across Iowa during the early morning hours of the 18th, bringing with it strong winds. The winds were cyclonic around the low, so direction was from the south over eastern Iowa with northwest winds in the west. Sustained winds of 25 to 40 mph were common across the state. Many areas reported gusts of 50 to 60 mph. Some damage was reported around the state. Trees were blown over in a few areas, in part due to the very wet ground conditions. Damage was reported in the Clinton area by the high winds. The winds blew a second story window out of a building in downtown Clinton, causing about \$4,000 in damage. At the Clinton Airport, winds were recorded at 63 mph in the strongest gust. Winds of 54 mph swept through downtown Des Moines. Several sheets of prefabricated wall, some weighing several hundred pounds, were lifted by the wind. The sheets had been secured by steel cable. One of the sheets was lifted and deposited on 15 cars in a nearby parking lot. Heavy damage was sustained with a few of the vehicles being totaled. There were also reports of several high profile vehicles blown off the highways in parts of the state. One truck transporting a prefabricated home was overturned with debris strewn over one-quarter-mile by the winds.

## IOWA Central Cont'd

As the storm mentioned above tracked across the state, a dry slot moved out just ahead of it. Thunderstorms fired along and just ahead of the dry slot. The winds aloft were quite strong at the time as were the gradient winds. As a result, the thunderstorms became severe in terms of high winds. A downburst wind caused damage on a farmstead in Benton County for the first report of the morning. There was one sighting of a funnel cloud in Muscatine County. Several tractor-semitrailer trucks were overturned in Cedar County as the gusty winds blew them off the roads. One driver received minor injuries as he was pinned inside his truck west of Clarence. The storms and gusty winds continued to track northeast. A roof was removed off a business in Stanwood, impaling boards into the ground. Another roof was taken off by high winds at Mayville. There were several reports of barns being blown down by the wind gusts. Several trees were down, as were power lines as well throughout east-central Iowa. A significant amount of damage was reported in Maquoketa by high winds. There were reports of several buildings sustaining structural damage caused by the winds. The event was a short event as the storms tracked rapidly northeast into Illinois and Wisconsin.

**074>078-085>089-097>099**

**Most of Iowa**

Rainfall during the rain event of the 26th was more significant than those earlier in the month. Amounts of one to three inches was common over much of central and east-central Iowa. The flooding from these rains was concentrated mainly over the Iowa River basin. This resulted in the issuance of Flood Warnings for parts of that area as Highway 63 was threatened. There was also flooding reported along the South Skunk basin east of Des Moines, as well as tributaries to the Des Moines River south of the Des Moines area. The flooding was again fairly minor with only minimal damage reported.

## IOWA, Northwest

<b>IAZ001&gt;003-012&gt;014-020&gt;022-031-032-Northwest IA</b>	<b>09 11</b>	<b>1100CST-2000CST</b>			<b>0</b>	<b>0</b>	<b>.05M</b>	<b>0</b>	<b>Freezing Rain, Snow</b>
---	--------------	------------------------	--	--	----------	----------	-------------	----------	----------------------------

Freezing rain, freezing drizzle, and snow fell over three days. Up to five inches of snow fell, but most problems were caused by freezing rain with numerous accidents and a few downed power lines. There was tree damage and slight damage to a house in Le Mars when a large tree fell on the house.

## Clinton County

Clinton	18	1215CST			0	0	4K	0	High Winds
Welton	18	1215CST			0	0	15K	0	High Winds

Thunderstorms produced severe wind damage as they plowed across parts of the two state region on this day. Several tractor-semitrailers were blown off of Interstate 80 near the Tipton interchange. One tractor-semitrailer was blown off of Highway 30 near Clarence with the driver trapped inside for some time. A roof was blown off a business in Stanwood with boards impaled into the ground. Ten trees were blown down in the Wyoming Township with a roof blown off the top of the local gas station. A roof was picked up and twisted around on a building at Maysville with the walls in danger of coming down. A barn was blown down in Delmar with power lines down in Goose Lake and Clinton. A 60 mph wind gust was recorded by the National Weather Service Office in Dubuque, Iowa. After the initial blast from the thunderstorms had ended additional high gradient winds picked up by midday. Damage occurred to a Burlington, Iowa elementary school when estimated 40 mph winds caused the roof to buckle and tear away sending three to five foot square chunks of foam roofing material flying from the building. A large second floor window in a downtown Clinton, Iowa business blew in and a second window on the fourth floor was cracked and intentionally destroyed due to the danger of breaking inward. The rubber membrane roof on the Welton Elementary School was lifted off the building and severely damaged.

## IOWA, Southwestern

Mills County S of Glenwood	07	1330CST			0	0	0	0	Hail (1.75)
-------------------------------	----	---------	--	--	---	---	---	---	-------------

Pottawattamie County Council Bluffs	07	1414CST			0	0	0	0	Hail (1.75)
--	----	---------	--	--	---	---	---	---	-------------

Pottawattamie County Treynor	07	1500CST			0	0	0	0	Hail (1.00)
Carson	07	1512CST			0	0	0	0	Hail (1.25)
15 N Red Oak	07	1515CST			0	0	0	0	Hail (0.88)
Treynor	07	1515CST			0	0	0	0	Hail (1.00)

Low pressure moved across central Nebraska as its associated warm front remained nearly stationary over eastern Nebraska. An upper level shortwave, unstable atmosphere, and cool low level temperatures combined to yield scattered thunderstorms that produced mainly large hail from near Gretna, across the Omaha/Council Bluffs Metropolitan area, east to Treynor, Iowa.

Fremont County Percival	08	2240CST			0	0	0	0	Hail (0.75)
----------------------------	----	---------	--	--	---	---	---	---	-------------

Page County Clarinda	08	2348CST			0	0	0	0	Hail (1.75)
-------------------------	----	---------	--	--	---	---	---	---	-------------

## KANSAS, Northeastern

Doniphan County Highland	08	1845CST	0	0	0	0	10K	0	Hail (1.75)
1 S Highland	08	1845CST	0	0	0	0	35K	0	Hail (2.75)
2 N Denton to Wathena	08	1845CST-							
		1920CST	12	100	0	0	500K	0	Tornado
2 N Denton	08	1845CST	0	0	0	0	?	0	Hail (1.75)

A severe thunderstorm produced golf ball- to baseball-size hail from Highland to just north of Denton. An apparent tornado formed two miles north of Denton and tracked east for 12 miles to near Wathena. Damage was intermittent along the narrow path, which averaged about 100-yards in width. Roofs were blown off of several barns and outbuildings. (F0)

Johnson County Edgerton	09	2225CST	0	0	0	0	10K	0	Hail (1.75)
Gardner	09	2230CST	0	0	0	0	10K	0	Hail (1.75)

Bucyrus	09	2338CST	0	0	0	0	5K	0	Hail (1.50)

# Storm Data and Unusual Weather Phenomena

April 1995

Location	Date	Time Local/Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage		Character of Storm
					Killed	Injured	Property	Crops	

Hail up to dime-size occurred in many areas across the entire county between 2330 and 2400 CST. Accumulated several inches deep.

### Doniphan County

Troy	10	0815CST	0	0	0	0	0	0	Hail (1.00)
2 N Troy	10	0845CST	0	0	0	0	0	0	Hail (1.00)
<b>Leavenworth County</b>									
7 W Linwood	16	0805CST	0	0	0	0	100K	0	Thunderstorm Winds
4.5 N Linwood	16	0815CST	0	0	0	0	300K	0	Thunderstorm Winds

Severe thunderstorms produced winds of 60 mph or greater west and north of Linwood. Numerous trees were uprooted across the area, and a barn and a mobile home were destroyed four and one-half miles north of Linwood.

### Johnson County

Edgerton	16	0812CST	0	0	0	0	0	0	Hail (0.75)
<b>Miami County</b>									
Hillsdale	16	0815CST	0	0	0	0	0	0	Hail (0.75)
Hillsdale	16	0815CST	0	0	0	0	0	0	Thunderstorm Winds
Hillsdale	16	0830CST	0	0	0	0	0	0	Hail (0.75)
Louisburg	16	0905CST	0	0	0	0	750K	0	Hail (1.75)

Severe thunderstorms dropped dime-size hail and knocked down large tree limbs in the Hillsdale area. The storm continued east to Louisburg where it dropped hail up to golf ball size. The hail punched fist-sized holes in vinyl siding and smashed windows on a few homes. Just north of town, the hail covered the ground several inches deep. A car dealership had damage to nearly every car on the lot, and five sheriff's department vehicles were damaged. Winds knocked down tree limbs and power lines, and nearly 1200 customers were without power.

### Wyandotte County

Edwardsville	16	1642CST	0	0	0	0	20K	0	Hail (1.75)
<b>Johnson County</b>									
Overland Park	16	1701CST	0	0	0	0	0	0	Hail (0.75)
Overland Park	16	1703CST	0	0	0	0	0	0	Hail (1.00)
Shawnee to Merriam	16	1825CST-2000CST	0	0	0	0	10K	0	Flash Flood

Heavy rains flooded streets in the Shawnee and Merriam areas, including Shawnee Mission Parkway, and Roe Avenue. Water was one to two feet deep over the roadway and many cars were stalled.

### Wyandotte County

South part of the county	16	1835CST-2030CST	0	0	0	0	10K	0	Flash Flood
--------------------------	----	-----------------	---	---	---	---	-----	---	-------------

Heavy rains flooded streets across the southern part of the county, including Interstate 35. Water was several feet deep in spots, and Interstate 35 had to be closed for three hours. Water was up to the car windows along one stretch, causing many stalls.

## KANSAS, Eastern

### Nemaha County

<b>Jackson Parish Jonesboro</b>	22	0300CST			0	0	0	0	<b>Hail (0.75)</b>
<b>Caldwell Parish Columbia</b>	22	0300CST			0	0	0	0	<b>Hail (0.75)</b>
Numerous reports of hail up to dime size in the city.									
<b>Caddo Parish Mooringsport</b>	22	0350CST			0	0	0	0	<b>Thunderstorm Winds</b>
Numerous trees downed by high winds that blocked Louisiana highway 169.									
<b>LAZ001-LAZ002 LAZ005 LAZ010-LAZ014 LAZ017-LAZ019 LAZ021</b>	22 22	1330CST- 2230CST			0	0	3	0	<b>Flash Flooding</b>
Widespread heavy rain of four to eight inches fell across much of Northern Louisiana produced flash flooding that closed numerous roadways. Torrential rain of 10 to 12 inches in southern Bienville and Jackson parishes and in northern Natchitoches and Red River parishes washed out many secondary roadways. Also small rivers such as the Dugdemona and Little Rivers had major flooding as well. Urban flooding was noted in many parts of Shreveport with several homes being evacuated in low lying areas.									
<b>Red River Parish</b>	22	1330CST- 1930CST			0	0	1	0	<b>Flash Flooding</b>
Several roads flooded and closed throughout the parish including Louisiana highway 155. Twenty five members of the Dry Creek Hunting Club were having a crawfish boil near highway 783 near Coushatta. They were trapped by high waters and some members had to wade to higher ground to get boats to rescue the others.									
<b>Natchitoches Parish Campti</b>	22	1330CST- 1930CST			0	0	1	0	<b>Flash Flooding</b>
Several roads flooded and closed throughout the northern half of the parish including U.S. Highway 71 in Campti.									
<b>LOUISIANA, Northwest Cont'd</b>									
<b>Natchitoches</b>	22	1330CST- 1930CST			0	0	1	0	<b>Flash Flooding</b>
The Town South, Wells, Parkway and Hancock subdivisions in Natchitoches had flooding on one to two feet cause damage in several houses.									
<b>Winn Parish</b>	22	1330CST- 1930CST			0	0	2	0	<b>Flash Flooding</b>
Every roadway in the parish was flooded and closed. Several homes were flooded and suffered damage.									
<b>Sabine Parish</b>	22	1430CST- 2030CST			0	0	1	0	<b>Flash Flooding</b>
Several roadways were flooded and closed throughout the parish including Louisiana highway 171 north of Converse and Louisiana highway 175 south of Belmont.									
<b>Caddo Parish Bossier Parish</b>	22	1530CST- 2130CST			0	0	1	0	<b>Flash Flooding</b>
Numerous homes were flooded in the Shreveport-Bossier City metropolitan area and evacuated. Widespread urban street flooding noted as well.									
<b>LAZ005, LAZ010</b>

<b>MAINE</b>									
<b>MEZALL</b>	<b>05</b>	<b>0700EST- 2000EST</b>			<b>0</b>	<b>5</b>	<b>300K</b>	<b>0</b>	<b>High Winds (G70)</b>
									Strong and unseasonably cold northwesterly winds swept through Maine due to a steep gradient between low pressure in the Gulf of St. Lawrence and high pressure centered over the Ohio Valley. Coastal areas were particularly hard hit. Highest recorded winds over non-mountainous terrain occurred at Monhegan Island with 80 mph, while several other locations reported gusts between 60 and 70 mph. Gusts near 100 mph were reported from the summit of Sugarloaf Mountain in western Maine. The wind combined with ambient temperatures near zero to produce windchill readings of -30 to -50 degrees in northern Maine. Four people were injured in a seven car pile-up near Presque Isle due to whiteout conditions produced by blowing snow. Another man was injured when a strong gust of wind blew his van off of an icy road. The winds toppled trees and power lines, damaging cars and houses and leaving 20,000 residences and businesses without electricity statewide.

## MARYLAND, Northeast

<b>MDZ008-012-015-019-020</b>	<b>04</b>	<b>2200EST-</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Extreme/Record Cold</b>
-------------------------------	-----------	-----------------	--	--	----------	----------	----------	----------	----------------------------

An unseasonably cold arctic air mass moved into the Northeast United States. Low temperature s reached into the mid to upper 20s throughout most of the area. Since the growing season was just starting, little harm was done. Nevertheless, blooms of ornamental trees (e.g., Magnolias) wer e damaged, especially in Cecil County.

<b>Cecil County Northwest</b>	<b>09</b>	<b>2000EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>
-------------------------------	-----------	----------------	--	--	----------	----------	----------	----------	---------------------------

A squall line of severe thunderstorms uprooted several trees in northwest Cecil County.

<b>Kent County 1 S Rock Hall</b>	<b>09</b>	<b>2015EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>
--------------------------------------	-----------	----------------	--	--	----------	----------	----------	----------	---------------------------

A couple of trees were toppled south of Rock Hall.

## MARYLAND, Central

<b>Allegany County Cumberland</b>	<b>04</b>	<b>1157EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>High Winds (G51)</b>
---------------------------------------	-----------	----------------	--	--	----------	----------	----------	----------	-------------------------

A wind gust of 59 mph was reported at the Cumberland regional airport. The winds were the result of a strong pressure gradient in advance of a late-season arctic front.

<b>MDZ003</b>	<b>05</b>	<b>0400EST-</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>?</b>	<b>Agricultural Freeze</b>
---------------	-----------	-----------------	--	--	----------	----------	----------	----------	----------------------------

A late-season arctic air mass caused temperatures to plunge into the mid 20s during the early morning of the 5th in Washington County. The cold air was accompanied by brisk northwest winds of 15 to 20 mph, and dew points fell into the single digits. Minor, scattered damage was reported primarily to stone fruits (apples and peaches), since temperatures remained below freezing for several hours and approached or fell below the minimum kill level of 25 degrees. Peach buds were in a somewhat accelerated growth state due to the mild weather of late March.

## MARYLAND, Central Cont'd

Thunderstorm winds blew down three trees.

<b>Anne Arundel County Glen Burnie</b>	<b>09</b>	<b>1937EST</b>			<b>0</b>	<b>3</b>	<b>3K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
--	-----------	----------------	--	--	----------	----------	-----------	----------	---------------------------

Thunderstorm winds blew down a ticket booth, damaged several rides, and hurled debris at a carnival in Glen Burnie. Two men and one woman were injured. The most serious injury was suffered by a 62 year-old man who was struck by the falling ticket booth. Minor injuries were sustained by a 19 year-old man and a 31 year-old woman. The man was injured by flying debris while on a thrill ride; the woman was inside the ticket booth when it fell. At around the same time (1934EST), wind gusts to 50 mph (44 knots) at Baltimore/Washington International Airport.

## MARYLAND, Southern

None reported.

## MARYLAND, Western

None reported.

## DISTRICT OF COLUMBIA

---------------	-----------	------------------------	--	--	----------	----------	----------	----------	-------------------

Strong and very cold west to northwest winds accompanied a late season blast of Arctic air. A peak gust of 60 mph was recorded by the National Weather Service at Worcester at 1038 EST. The temperature had dropped to a record low 12 degrees at 0630 EST, breaking the old record for the date by five degrees. Wind chill indices dropped to 20 below zero. In Scituate, three children died in a wind-whipped house fire. At the Blue Hill Observatory in Milton, a peak wind gust of 69 mph was recorded. The temperature dropped to a record low of 15 degrees, breaking the old record of 18 degrees for the date. Scattered power outages were reported, especially in the central and eastern part of the state, affecting several thousand customers. There were reports of trees down through Berkshire County.

## MICHIGAN

<b>MIZ008</b> <b>Eastern Upper</b>	<b>04</b> <b>05</b>	<b>1900EST-</b> <b>0700EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Lake Snow</b>
---------------------------------------	------------------------	-----------------------------------	--	--	----------	----------	----------	----------	------------------------

An unseasonably cold outbreak of arctic air resulted in lake effect snow across northern Michigan from the 3rd through the 5th. Heavy snow developed across eastern upper Michigan during the evening on the 4th, then continued through the early morning hours on the 5th. The heaviest accumulation was reported at Sault Ste Marie, where nine inches fell. Snow amounts across most of the rest of northern Michigan were three inches or less.

<b>MIZ001&gt;002</b> <b>Northwest Upper</b>	<b>18</b> <b>18</b>	<b>1400EST-</b> <b>2400EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>
--	------------------------	-----------------------------------	--	--	----------	----------	----------	----------	-------------------

Snow fell across northwest upper Michigan on the 18th as low pressure tracked from Iowa northeast across northern lower Michigan. Heavy snow was confined to the Keweenaw Peninsula, where nine inches accumulated at Bumbletown and seven inches accumulated at Chassel. Accumulating snow fell as far east as Marquette, where nearly two inches was reported.

## Northeast

A narrow band of heavy snow fell from near Pine City through the Duluth area to Two Harbors. Snowfall amounts ranged from five to seven inches. The snow which started out as rain, resulted in a very slippery slush on roads, causing numerous accidents. East winds gusting over 45 mph created near whiteout conditions and piled up ice in the Duluth harbor.

### Mower County Rose Creek

**18 1220CST Short Narrow 0 0 55K 0 Tornado (F0)**

A small tornado touched down damaging a machine shed and a home as well as uprooting some trees. Debris was scattered over a stretch of one mile.

### Mower County 8 E Grand Meadow

**18 1300CST Short Narrow 0 0 15K 0 Tornado (F0)**

A small tornado briefly touched down damaging a farm building. Debris was scattered over an area three-quarters of a mile wide.

## MINNESOTA, Western

### MNZ071-072-080-081-089-090-097-098-Southwest MN

**09 1600CST-10 1000CST 0 0 0 0 Heavy Snow**

Heavy snow accumulated 10 inches at Tyler and Lake Benton, eight inches at Pipestone, and five inches at Tracy and Worthington.

### MNZ080-081-089-090-097-098-Southwest MN

**10 1700CST-11 1700CST 0 0 0.2M 0 Freezing Rain**

Freezing rain and freezing drizzle fell over a three day period in southwest Minnesota. Up to a foot of snow fell near the western border of the state, but most damage was caused by freezing rain. Numerous power lines and some poles were down. Thousands of people were without power, some for two days or more. There was tree damage, and some damage to vehicles caused by falling limbs and branches. A few accidents were caused by the snow and freezing rain.

## MISSISSIPPI, Northern

### MSZ002>006-009-013>015-020-021

**11 0730CST 0 0 0.1M 0 High Winds**

High winds not associated with thunderstorms moved through a large part of north Mississippi. Winds gusted to more than 60 mph at times. Several mobile homes were destroyed. Other buildings were damaged and numerous trees and power lines were blown down.

### Clay County Srn Clay County

**20 1642CST 0 0 5.0K 0 Thunderstorm Winds**

Several trees and power lines were knocked down.

### Lowndes County Crawford to 1 N Steens

**20 1815CST-1833CST 32 100 0 0 0.1M 0 Tornado (F2)**

The tornado first touched down near the town of Crawford in southwest Lowndes County and moved northeast and moved near the Alabama border. One house was completely destroyed. A second home had its living room destroyed. One home was pushed off its foundation. Several homes had their windows blown out. A few mobile homes suffered extensive roof damage. Numerous trees and power lines were knocked down.

The county sheriff's office reported several large trees down over County Roads 42, 28, and Z.									
<b>Maries County 5 SW Vienna</b>	<b>10</b>	<b>1756CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Thunderstorm Winds</b>
A county sheriff reported that the second in a series of severe thunderstorms knocked down two large trees onto County Route V.									
<b>Benton County Lincoln</b>	<b>16</b>	<b>1224CST</b>			<b>0</b>	<b>0</b>	<b>3K</b>	<b>0</b>	<b>Hail (1.25)</b>
A severe thunderstorm produced widespread small hail and scattered reports of large hail.									
<b>Morgan County 2 E Gravois Mills</b>	<b>16</b>	<b>1300CST</b>	<b>0.5</b>	<b>100</b>	<b>0</b>	<b>0</b>	<b>175K</b>	<b>0</b>	<b>Tornado (F1)</b>
A tornado touched down briefly between one and two miles east of Gravois Mills near the 6.5 mile marker along the Gravois Arm of the Lake Of The Ozarks. A report made by an officer of the Missouri State Water Patrol indicated that the tornado turned over 20 boat docks and damaged or sank between 20 and 25 boats. At least one house was damaged and eyewitnesses said that trees were uprooted with some of the debris left floating on the water. The length and width of the tornado were estimated based on damage reports.									
<b>Morgan County Miller County 1 NE Rocky Mount</b>	<b>16</b>	<b>1340CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Hail (1.25)</b>
<b>MISSOURI, Central Cont'd</b>									
A county sheriff reported large hail at the county line near the intersection of County Route W and County Route Y.									
<b>Benton County</b>	<b>17</b>	<b>1850CST-</b> <b>17 2100CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Flash Flood</b>
Strong thunderstorms produced heavy rain which caused many creeks and small streams to overflow their banks. Many of the low bridges in the county were affected with flooding particularly severe on County Road 7 between Warsaw and the Henry County line and on County Route C west of Lincoln.									
<b>Pulaski County 3 SW Dixon</b>	<b>29</b>	<b>1030CST-</b> <b>29 1100CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Urban/Small Stream Flood</b>
A county sheriff reported flooding on County Route O at Jones Creek.									
<b>Morgan County 2 SE Florence to 5 SE Florence</b>	<b>29</b>	<b>1330CST-</b> <b>29 1400CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Urban/Small Stream Flood</b>
A mostly light but steady rain fell on ground that was already saturated from heavy rain that fell earlier in the day. The excess water caused the Richland and Gabriel creeks to flood County Route BB between Florence and Versailles.									
<b>MONTANA</b>									
<b>MTZ003&gt;009</b>	<b>08</b>	<b>0200MST-</b> <b>09 2200MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>
A winter storm dropped from five to eight inches over most areas east of the continental divide. Higher elevations saw over a foot of accumulation with some of the ski resorts in the Southwest receiving three to four feet of new snow. Forty mph winds caused drifts up to six feet in the Glasgow area.									
<b>MTZ004&gt;007</b>	<b>13</b>	<b>1800MST-</b> <b>14 1800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>
Four to six inches of snow fell over portions of central and southwest Montana with up to 10 inches South of Havre.

April 1995

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Injured	Estimated Damage Property	Crops	Character of Storm
----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------	---------------------------------	-------	--------------------

Snow began on the 9th with snowfall ranging from three inches at Imperial to five inches at Mullen on the morning of the 10th. A strong north wind produced drifting and poor visibilities. Snow continued all day the 10th and ended on the morning of the 12th with snowdepths ranging from 7 inches at Imperial to 11 inches at Mullen. Average depths were between five and eight inches with the greatest depths along an Imperial to Ogallala to Mullen line.

<b>NEZ011&gt;015-016&gt; 018-032&gt;034-</b>	<b>10</b>	<b>1700CST-</b>							
	<b>11</b>	<b>1100CST</b>			<b>0</b>	<b>0</b>	<b>75K</b>	<b>0</b>	<b>Ice Storm</b>

A mixture of precipitation fell over northeast Nebraska with one to one and a half inches of ice accumulating on surfaces as the temperatures were steady from 29 degrees to 31 degrees. The ice area extended mainly from the tips of Stanton, Cuming, and Burt counties, to the rest of northeast Nebraska. Two to three inches of wet snow falling on the morning of the 11th worsened conditions which forced thousands of customers to go without power.

<b>Johnson County Tecumseh</b>	<b>10</b>	<b>2200CST</b>							
					<b>0</b>	<b>0</b>	<b>10K</b>	<b>0</b>	<b>Lightning</b>

Lightning struck the steeple of the First Baptist Church in Tecumseh.

	<b>14</b>	<b>2000CST</b>			<b>0</b>	<b>0</b>	<b>50K</b>	<b>0</b>	<b>High Winds (G61)</b>

High winds of 35 to 45 mph with gusts of 65 to 70 mph raked parts of the Nebraska Panhandle and western Nebraska. Several mobile homes were damaged and power lines were downed.

<b>Thomas County Halsey</b>	<b>14</b>	<b>1645CST-</b>							
	<b>15</b>	<b>0600CST</b>			<b>0</b>	<b>0</b>	<b>192K</b>	<b>0</b>	<b>Wildfire</b>

## NEBRASKA, Eastern Cont'd

Lightning started a grass fire on a private ranch a few miles west of the Nebraska National Forest. Fanned by 30 to 40 mph winds, the fire quickly spread, blackening 6,885 acres of the 93,000 acre forest. Damage estimates included 5495 acres of grassland, 190 acres of timber, and 1200 acres of private land. Due to the timing of the fire, the damage estimates were mainly confined to the loss of timber and fences.

<b>NEZ004&gt;006-008- 009-022&gt;026-027- 035&gt;038-056&gt;059- 069&gt;071-</b>	<b>17</b>	<b>1200CST-</b>							
	<b>18</b>	<b>1200CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

Low pressure over Oklahoma rapidly deepened and moved northeast to eastern Iowa. The precipitation started as rain in most locations and by midnight four to six inches of snow had fallen at Valentine, Mullen, and Hyannis with the rain/snow line from Ainsworth to North Platte. By 0800 CST a band of 8 to 18 inches of heavy snow extended from Ogallala northeast across Mullen and Thedford to Ainsworth. In addition to the heavy snow, northwest winds at 20 to 40 mph gusting to 50 mph created major drifting and reduced visibilities.

## NEBRASKA, Extreme Southwest

None reported.

## NEBRASKA, Western

<b>NEZ001&gt;003-020-021-054-055</b>	<b>10</b>	<b>0800MST-</b>							
	<b>11</b>	<b>1800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

Snow fell across much of western Nebraska with amounts of five to eight inches common. Windy weather created a lot of blowing and drifting snow. Crawford (18 miles southwest of Chadron) reported 14 inches of snow while the northeast corner of Sioux county had up to nine inches of snow.

<b>NEZ001&gt;003-019&gt;021-054-055</b>	<b>14</b>	<b>1200MST-</b>							
	<b>14</b>	<b>1700MST</b>			<b>0</b>	<b>0</b>	<b>4</b>	<b>0</b>	<b>High Winds (G60)</b>

A strong cold front pushed through western Nebraska during the afternoon hours. This produced strong winds along with some damage. The Scottsbluff Airport has a peak wind gust of 63 mph. This wind gust was a record gust for the month of April at the Scottsbluff Airport. A peak wind gust of 69 mph was logged at the Alliance Airport. A peak wind gust of 61 mph was logged at the Sidney Airport. The high winds in the Scottsbluff, Gering, and Alliance areas caused numerous power outages due to downed power lines and snapped power poles. An estimated \$15,000 damage was done. Some large trees were uprooted along with roof damage to a few homes.

## NEVADA

<b>NVZ001 Lake Tahoe-Truckee Area</b>	<b>07</b>	<b>1000PST-</b>							
	<b>08</b>	<b>1000PST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>0</b>	<b>Heavy Snow High Winds</b>

A vigorous and fast-moving winter storm brought strong winds and heavy snow to the Sierra Nevada. The Sugar Bowl Ski Area reported from 11-28 inches of new snow. In addition, winds were regularly measured at between 90 and 100 mph at mountain top sites around Lake Tahoe.

<b>NVZ003-006-009 Extreme Western, Northeast, and Extreme Southern Nevada</b>	<b>12</b>	<b>1800PST-</b>							
	<b>14</b>	<b>0700PST</b>			<b>0</b>	<b>?</b>	<b>810K</b>	<b>0</b>	<b>Heavy Snow High Winds</b>

A strong cold front brought strong winds to much of Extreme Western Nevada with both strong winds and heavy snow across northeastern parts of the state. Peak wind gusts to 61 and 73 mph were reported at Gardnerville, Nevada, the evening of the 12th with gusts to 78 mph in south Reno. As the storm moved east, heavy snow and strong winds affected the northeast. The town of Wendover, along the Nevada/Utah border, reported peak wind gusts to 65 mph. Elko, Nevada, reported 3 inches of new snow in 3 hours with total accumulations of about six inches in the Spring Creek area south of Elko. The Halleck area also received about eight inches of snow during a twelve hour period.

Substantial damage occurred in Extreme Southern Nevada as winds behind the cold front gusted as high as 60 mph in the Las Vegas valley and up to 70 mph over Lakes Mead and Mohave. Around Las Vegas, trees and utility poles were toppled; property damage was reported at homes and businesses; and more than 12,000 homes were without power for part of the night. Damage was also notable at Lakes Mead and Mohave as winds cut boats loose from moorings and damaged marinas as well.

<b>NVZ003-004 Extreme Western and West Central Nevada</b>	<b>15</b>	<b>1900PST-</b>							
	<b>16</b>	<b>1200PST</b>			<b>1</b>	<b>1</b>	<b>?</b>	<b>0</b>	<b>Heavy Snow</b>

Heavy snow fell across Extreme Western and West Central Nevada as a low pressure disturbance moved through the area. The Mina, Middlegate, and Virginia Foothills areas all received four inches snow during the evening hours of the 15th and early morning hours of the 16th. A 48 year-old male resident of Fernley, Nevada, died of exposure to snow and cold while searching for help after his vehicle broke down. His male companion only suffered minor injuries.

Severe thunderstorms moved across central and eastern New York during the late morning and early afternoon of the 4th ahead of a powerful cold front. At N orrie State Park in Staatsburg 75 to 100 trees were blown down. Central Hudson Electric and Gas Company reported over 16,000 customer s without power during the height of the storms. Other areas hit hard by the storms were Livingston and Germantown in Columbia County where numerous trees were toppled some of which fell o n homes.

behind the front on gusty northwest winds, producing bands of lake effect snow squalls. In general 2 to 6 inches of snow fell across this area. Six inches of snow was reported in Cazenovia in Madison County.

<b>Areawide</b>	<b>05</b>	<b>AM</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Record Cold</b>
-----------------	-----------	-----------	--	--	----------	----------	----------	----------	--------------------

Arctic high pressure settled across eastern New York on the morning of April 5th resulting in record low temperatures across the Susquehanna region. Binghamton dropped to 14 degrees which broke the previous record low of 16 degrees set in 1982. At Massena the temperature dropped to 8 degrees which broke the previous record low of 10 degrees set in 1964.

<b>Saint Lawrence Valley</b>	<b>06</b>	<b>AM</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Record Cold</b>
------------------------------	-----------	-----------	--	--	----------	----------	----------	----------	--------------------

Record cold occurred across the Saint Lawrence Valley for the second consecutive night as the temperature dropped to 9 degrees which broke the previous record low of 14 degrees set in 1982.

<b>NYZ036&gt;038-044&gt;046-055&gt;066</b>	<b>08</b>	<b>0400EST-1600EST</b>			<b>0</b>	<b>0</b>	<b>50K</b>	<b>0</b>	<b>Snow, Sleet, Freezing Rain</b>
--	-----------	------------------------	--	--	----------	----------	------------	----------	-----------------------------------

A warm front moved north from Pennsylvania into central New York on the morning of the 8th. Milder air behind the front caused the snow to changeover to sleet and freezing rain and eventually all rain by late afternoon. By early afternoon snowfall accumulations ranged from 2 to 6 inches.

## NEW YORK, Central Cont'd

Some specific snowfall amounts included 5.1 inches at Binghamton, 4 inches at Woodstock, 3.8 inches at Hurley and Kerhonkson and 3 inches at Stormville. Numerous traffic accidents were reported across the area as a result of the snow.

<b>NYZ036-037-044&gt;046-055&gt;057</b>	<b>09</b>	<b>1200EST-2300EST</b>			<b>0</b>	<b>0</b>	<b>50k</b>	<b>0</b>	<b>Snow, Sleet, Freezing Rain</b>
---	-----------	------------------------	--	--	----------	----------	------------	----------	-----------------------------------

An arctic cold front crossed central New York during the early afternoon on April 9th resulting in mixed precipitation across the Southern Tier of New York. A shallow layer of cold air behind the front changed rain to freezing rain and sleet and then to wet snow. The snow only accumulated 1 to 2 inches, but icy roads from the mixed precipitation caused many minor traffic accidents.

<b>NYZ028-031-034-035</b>	<b>15</b>	<b>1800EST-16</b>			<b>0</b>	<b>0</b>	<b>5K</b>	<b>0</b>	<b>Snow</b>
---------------------------	-----------	-------------------	--	--	----------	----------	-----------	----------	-------------

A low pressure system over northern New England circulated snow across northeast New York late on the 15th and early on the 16th of April with snowfall amounts in the 2 to 4 inch range. Some specific snowfall amounts included 3.3 inches at Ray Brook and 3 inches at Ellenburg Depot.

<b>Susquehanna Region</b>	<b>seasonlong</b>				<b>0</b>	<b>0</b>	<b>0</b>	<b>?</b>	<b>Snow Drought</b>
---------------------------	-------------------	--	--	--	----------	----------	----------	----------	---------------------

Through the end of April, the seasonal snowfall total in Binghamton was the third lowest on record at 52.8 inches. The lowest total ever recorded was 47.8 inches during the winter of 1988-89.

Suffolk County									
Hauppauge	04	1348EST			0	0	?	0	Thunderstorm Winds (G50)

A squall line moving across the region produced an enormous amount of damage during the afternoon hours. Powerful winds, the result of several microbursts, downed thousands of trees and power lines. Numerous structures received various degrees of damage. A significant amount of this damage occurred to the roofs. In Yonkers, a 50-foot tree crushed the front hood of a car waiting at a stop light. The driver was injured and taken to a hospital for treatment.

	The Scioto River exceeded flood stage of nine feet and crested at 9.4 feet on the 13th at 0600 EST. Flooding was confined to low lying areas along the river.								
<b>Knox County Bladensburg</b>	<b>18</b>	<b>1755EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Hail (0.75)</b>
<b>Holmes County Millersburg and southwestern part</b>	<b>18</b>	<b>1815EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Thunderstorm Winds</b>
	Winds to 60 mph were reported by the highway patrol. Large limbs were downed, some blocking roads.								
<b>OHIO, Northern Cont'd</b>									
<b>Wayne County Dalton and southeast part</b>	<b>18</b>	<b>1835EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Thunderstorm Winds</b>
	Numerous large limbs were downed.								
<b>Portage County Ravenna</b>	<b>18</b>	<b>1905EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Thunderstorm Winds</b>
	A large tree was downed blocking a road. Large limbs were downed.								
<b>Lorain County Countywide</b>	<b>21</b>	<b>0845EST</b>			<b>0</b>	<b>0</b>	<b>15K</b>	<b>0</b>	<b>Flash Flood</b>
<b>Cuyahoga County Countywide</b>	<b>21</b>	<b>0910EST</b>			<b>0</b>	<b>0</b>	<b>20K</b>	<b>0</b>	<b>Flash Flood</b>
<b>Lake County Countywide</b>	<b>21</b>	<b>0925EST</b>			<b>0</b>	<b>0</b>	<b>15K</b>	<b>0</b>	<b>Flash Flood</b>
	Heavy rains of about one and one-half to two inches fell during the morning on top of saturated grounds. Flooding of poor drainage areas, basements, and small streams occurred. High water persisted well into the afternoon. Volunteer observers in Kirtland (Lake County) reported 2.2 inches of rain and 1.7 inches in LaGrange (Lorain).								
<b>Ashland County Charles Mills State Park</b>	<b>21</b>	<b>0810EST</b>			<b>0</b>	<b>0</b>	<b>10K</b>	<b>0</b>	<b>Thunderstorm Winds</b>
	Trees were snapped and about a dozen pontoon boats in dry dock were scattered about. A tornado was suspected at first, but it was determined that downburst with winds to about 80 mph was what actually occurred.								
<b>OHZ011-012-020- 030-031 North-Central</b>	<b>21 21</b>	<b>1215EST- 1325EST</b>			<b>0</b>	<b>0</b>	<b>120K</b>	<b>0</b>	<b>High Winds</b>
	Damaging winds developed just ahead of a cold front and affected parts of Ashland and Wayne County north through Medina County to Cuyahoga and Lake Counties. Trees were downed in a number of locations and some roof damage was reported with the most significant occurring at a strip plaza in Cleveland (Cuyahoga) where much of the roof was blown off. Winds were measured at 67 mph at Lost Nation Airport (Lake 012).								
<b>Marion County LaRue</b>	<b>21 23</b>	<b>2100EST- 0000EST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Flood</b>
	The Scioto River exceeded flood stage of 11 feet and crested at 12.3 feet on the 22nd at 0630 EST. Agricultural fields that had not yet been seeded were flooded.

Severe thunderstorms moved across eastern Oklahoma during the late morning and afternoon of April 10th. Strong thunderstorm winds destroyed 2 barns and damaged an antenna pole and a porch 3 miles southwest of Yanush. Hail up to 1.50 inches in diameter also fell at this location. Strong thunderstorm winds downed numerous trees in Wilburton, near Stigler, near McCurtain, and just east of Spiro. Thunderstorm winds gusted to 60 miles an hour in Cameron, and power lines were blown down by strong thunderstorm winds in Bokoshe. Quarter to golfball size hail fell at Yonkers, and half dollar size hail fell at Whitefield and at Muldraw. Dime size hail covered the ground 10 miles northwest of McAlester, and dime to quarter size hail fell at numerous other locations in eastern Oklahoma.

Very heavy rainfall from the thunderstorms also resulted in flash flooding in parts of northeastern Oklahoma. Widespread street flooding occurred in Henryetta, Wagoner, Locust Grove, and Tahlequah, where some streets were closed and low-water bridges were also flooded. Widespread street flooding also occurred in Muskogee, and some county roads were closed by flooding near Muskogee. State Highway 51A between Coweta and Red Bird was also flooded. Lightning started a house fire in Tahlequah which caused \$3000 damage, and lightning also started a fire at an oil tank near Bristow.

### Osage County

Severe thunderstorms developed in northeast Oklahoma during the late afternoon and evening of April 16th. The storms produced large hail, damaging winds, and 1 tornado. The tornado touched down 1 mile east of Avant at 1650CST and was on the ground for 0.2 miles. 2 mobile homes were damaged by this 50 yard wide, F-0 tornado. Strong thunderstorm winds overturned and damaged a camper just southwest of Vinita, and a mobile home was also blown 5 feet off its foundation just southwest of Vinita. Strong thunderstorm winds blew part of the roof off a bus barn and caused damage to the south end of the bus barn at the corner of Osage Street and 2nd Street in Skiatook. Several trees and large tree limbs were also blown down in Skiatook. Strong thunderstorm winds downed trees 2 miles east of Oologah, and winds gusted to 65 miles an hour at Tall Chief Cove in Sperry.

<p>Half dollar size hail fell at Cleveland, and quarter size hail covered the ground 8 miles southwest of Bowring and at Osage. Dime to quarter size hail also fell at several other locations in northeast Oklahoma. Very heavy rainfall from the thunderstorms also resulted in flash flooding. Considerable street flooding occurred in Chelsea, and water entered some businesses on Main Street in Chelsea. Approximately 10 low-water bridges had to be closed in the Chelsea area due to high water. High water flooded roadways in Hominy, and considerable street flooding occurred in Cleveland and from just west of Skiatook into Skiatook.</p>

Severe thunderstorms moved across eastern Oklahoma during the evening of April 17th. The storms produced a total of 8 tornadoes, as well as large hail and damaging winds.

The first five tornadoes all occurred with the same supercell thunderstorm. The first tornado touched down briefly 6 miles east southeast of Henryetta at 2100CST. No damage occurred with this F-0 tornado.

The second tornado was another brief touchdown just west northwest of Hoffman at 2119CST. No damage occurred with this F-0 tornado.

The third tornado was another brief touchdown 2.25 miles northeast of Council Hill at 2130CST. Trees were downed by this F-0 tornado.

The fourth tornado touched down in a residential area 1 mile south of Okay at 2214CST. The tornado heavily damaged 2 homes and caused minor damage to 9 homes in the residential area. 5 mobile homes were also destroyed, and 5 other mobile homes were damaged. Several vehicles were either damaged or destroyed, numerous power poles were downed, and numerous trees were uprooted. The tornado continued east northeast for approximately 4.5 miles before lifting 4 miles east of Okay at 2221CST just before reaching the Fort Gibson Lake Dam. This tornado was 125 yards wide and was rated as an F-2.

The fifth tornado touched down 2.5 miles south of Peggs at 2232CST. The tornado damaged a Free Will Baptist Church camp building and also damaged a barn and uprooted trees. This F-1 tornado was on the ground for 1/4 mile and was 50 yards wide.

The sixth tornado touched down near Qualls at 2235CST and moved northeast for 7 miles before lifting 8 miles south of Tahlequah near the town of Keys at 2245CST. The tornado damaged Carter's Automotive Building 8 miles south of Tahlequah, and several vehicles were thrown a considerable distance from the building. The tornado also caused approximately \$100,000 damage to a county solid waste plant in the same general area. This tornado was 200 yards wide and was rated as an F-2.

The seventh tornado touched down 3 miles southeast of Stilwell at 2302CST and moved northeast for 1 mile before lifting 3 miles east southeast of Stilwell at 2304CST. The tornado destroyed 1 modular home, 1 mobile home, and 2 chicken houses, and caused minor damage to several other homes. This tornado was 75 yards wide and was rated as an F-1.

The eighth tornado was spawned by the same storm which produced the first five tornadoes. It touched down briefly 3.5 miles northwest of Colcord at 2310CST. The tornado damaged the roof of 1 home and also damaged 3 barns. This tornado was 40 yards wide and was rated as an F-0.

The storms also produced strong straight-line winds which caused considerable damage. Strong thunderstorm winds destroyed 2 mobile homes and damaged 4 other mobile homes at the Robinson

# Storm Data and Unusual Weather Phenomena

Trailer Park 3 miles northeast of Sapulpa. 1 resident of the park suffered a back injury as a result of the storms. A mobile home was destroyed and a chicken house was damaged by strong thunderstorm winds 4 miles east of Stilwell, and strong winds damaged a trailer house near Council Hill. A house was damaged by high winds 2 miles south of Hulbert, and chicken houses were blown over in Rose.

Thunderstorm winds estimated at 80 miles an hour in Muskogee blew the roofs off a couple buildings and knocked down light poles and large tree branches. A barn was destroyed, a window was blown out, and trees were downed by strong winds just southwest of Muskogee. Several roofs were blown off outbuildings and windows were blown out 3 miles west of Muskogee, and a chimney was blown off a roof and several large tree limbs were downed in Nowata. Strong thunderstorm

## OKLAHOMA, Northeastern Cont'd

winds blew a large tree onto the roof of a house in Avant, and the skirting was blown off a trailer and numerous trees were downed 4 miles north of Sand Springs.

Strong thunderstorm winds damaged a brick building in Henryetta, blowing off bricks near the top of the building, and trees were blown down onto a house near Grove. Lines, trees, and an amateur radio tower were downed by strong winds 2 miles north of Oaks, and strong winds downed a large radio tower near Mannford. 60 mile an hour winds blew the windows out of a store and downed trees in Poteau, and up to 50 large trees were blown down just east of Eucha.

Strong thunderstorm winds downed numerous trees from 2.5 miles south of Peggs to 3 miles east of Peggs, and 3 barns were destroyed 3 miles east of Peggs. Thunderstorm winds downed trees and power lines in Battiest, 3 miles south of Leach, and 2 miles north of Twin Oaks, and several trees were blown over onto power lines in Quapaw. A large tree was blown down 4 miles west of Sand Springs, and large tree limbs were blown down in Sand Springs and in Weleetka. Strong thunderstorm winds downed numerous large tree limbs in Bearden, and several large tree limbs were downed by strong winds near Big Cabin.

Thunderstorm winds gusted to 70 miles an hour 3 miles west of Okay, to 67 miles an hour in Sapulpa, and to 65 miles an hour 5 miles southwest of Oologah. Thunderstorm winds gusted to 65 to 70 miles an hour at Sequoyah State Park 8 miles east of Wagoner, and to 60 to 70 miles an hour in Collinsville. Thunderstorm winds gusted to 60 miles an hour 7 miles west of Nowata, 8 miles west of Claremore, and at several locations in McIntosh County.

Large hail also accompanied some of the storms. Half dollar size hail fell at Dewar, and nickel size hail fell at Hitchita, 10 miles west of Checotah, and at Fountainhead State Park 6 miles north of Eufaula. Dime size hail fell in Vera.

Very heavy rainfall from the thunderstorms also resulted in flash flooding in parts of northeast Oklahoma. Street flooding occurred in the south and southeast parts of Osage County, 10 miles east of Terilton, and in Mannford. Street flooding also occurred in Muskogee, and U.S. Highway 69 was flooded 3 miles north of Muskogee. Streets were closed by flooding in Morris, and State Highway 62 was closed east of Morris due to 3 feet of water covering the roadway. Water also entered some garages and basements in Morris, and a bridge was damaged by flooding 2.25 miles south of Morris.

<p>Severe thunderstorms developed in eastern Oklahoma during the evening of April 19th. Strong thunderstorm winds in West Siloam Springs blew in a wall and blew out all the doors of the new fire department. Telephone poles were snapped in two places near the West Siloam Springs police department, and numerous trees and power lines were also downed in West Siloam Springs. Strong thunderstorm winds totally destroyed 3 trailer homes 3.5 miles west of West Siloam Springs, and a roof was blown off a mobile home and several outbuildings were destroyed 2 miles west of West Siloam Springs. A tree was blown onto the Mosely School 2 miles north of West Siloam Springs, and a tree was blown onto a main feeder line just east of Kansas.</p> <p>Strong thunderstorm winds downed trees in Flint across State Highway 412 and also at the entrance to the Cherokee Turnpike. Several large tree limbs were blown down in Chewey and in Porum. Golfball size hail fell just east of Enterprise, and quarter size hail fell 1/2 mile west of West Siloam Springs and at Porum. Nickel size hail fell at Kiowa, and dime size hail fell at McAlester and at Hallett.</p>

<p>Severe thunderstorms moved across eastern Oklahoma during the early morning of April 29th. Strong thunderstorm winds blew down large tree branches in Vera, and thunderstorm winds gusted to 60 miles an hour 10 miles east of Foraker, 2 miles east of Claremore, and in Stilwell. Quarter size hail fell at Sallisaw and at Big Cedar, and nickel size hail fell at Ramona and 3 miles north of Locust Grove. Dime size hail fell at several other locations in northeast Oklahoma.</p> <p>Very heavy rainfall from the thunderstorms also resulted in flash flooding in northeast Oklahoma. Street flooding occurred in Bartlesville, Nowata, and Wagoner, and Main Street in Hominy was also flooded. Street flooding occurred in the city of Tulsa at the intersection of 31st Street South and Mingo Road and at the intersection of West 41st Street and Elwood Avenue, where water covered the road to a depth of 1 foot.</p> <p>Streets were flooded near Sand Springs, and roads were flooded near and just south of the town of Muskogee. Some county roads north of Interstate 40 in Muskogee County were also under water, and county roads were flooded between Skedee and Blackburn in Pawnee County. In Rogers County, a county road was briefly closed by flooding between Claremore and Foyil. A few small creeks overflowed over roads in Mannford, and high water flooded some low-lying roads in Hitchita.</p>

<p>Severe thunderstorms developed and moved eastward across central and southern Oklahoma during the morning, producing damaging winds across much of the area and hail as large as golf balls at SE 29th and Luther Road in Oklahoma City.</p> <p>In Cushing in Payne County winds up to 63 mph took part of the roof off a metal building, blew a tree down, and blew windshields out of cars. In Agra in Lincoln County a barn was destroyed. Severe thunderstorm winds in Hugo in Choctaw County downed numerous trees and power poles, landing on several mobile homes and barns. Roofs were also blown off a shed and a mobile home.</p> <p>The storms were electrically very active, with three reported cases of lightning damage. In Norman in Cleveland County lightning set fire to a duplex around 0900 CST, causing about \$45,000 in damage. Also in Norman about an hour later lightning struck and destroyed a house chimney. In Seminole County southeast of Wolf an oil tank battery was hit by lightning and set on fire early in the afternoon.</p>

Severe thunderstorms moved across southwestern and south-central Oklahoma during the afternoon and early evening, producing two tornados, damaging winds, large hail, and flash flooding. A second area of thunderstorms moved across northern Oklahoma during the afternoon and produced large and damaging hail.

With the storms in southwest Oklahoma two tornados were reported. The first occurred in Tillman County where a small, brief F0 tornado (gustnado) spun up on the leading edge of a thunderstorm three miles southwest of Tipton. No damage was reported.

The second tornado, an F1, occurred three miles east of Faxon in Comanche County around 1600 CST. Along a path about one-quarter mile long and 33 yards wide, two barns were destroyed, a propane tank was blown over, tops of trees were twisted and snapped, and power poles were downed.

Also with these storms in southwest Oklahoma, baseball-size hail fell in Indiahoma in Comanche

County, broke out car windows east of Duke in Jackson County, and broke out house windows three miles northeast of Tipton in Tillman County. Flash flooding also became a problem as water was reported up to car headlights in Comanche in Stephens County.

As the storms moved eastward into south-central Oklahoma, thunderstorm winds increased and some damage was reported. A barn was destroyed by severe thunderstorm winds near Faxon in Comanche

## OKLAHOMA, Western and Central Cont'd

County, and wind speeds as high as 72 mph were reported south of Duncan in Stephens County. In Carter County five miles north of Lone Grove, winds destroyed three barns and a wellhouse and did slight damage to three houses.

In northern Oklahoma wind-driven hail in severe thunderstorms caused both crop and property damage. Quarter- to half-dollar-size hail in Garfield County broke out house windows three miles south of Fairmont and five miles southeast of Garber. In Noble County six miles south of Billings house windows were broken out by golf ball-size hail. Many wheat fields in Garfield and Noble Counties were also destroyed.

Thunderstorms developed in southwest Oklahoma throughout the afternoon and evening then moved northeastward across south-central and central Oklahoma through the evening, producing eight tornados, large hail, damaging straight-line winds, and flash flooding. Other isolated severe storms in northwest Oklahoma produced large hail.

The first tornado, a brief F0, occurred on the Red River six miles southwest of Grandfield in Tillman County and did no reported damage. The storm then moved into Cotton County where it spawned its second, third, and fourth tornados. The second tornado was spotted four miles southwest of Devol and the third was just southeast of Devol. No damage was reported with either tornado and both were rated F0.

The fourth tornado of the day began about 2.6 miles north and one-half miles west of Temple in Cotton County and moved east-northeast for two miles before dissipating. Along this path, several trees were uprooted or snapped off at ground level, power lines were downed, and a 200 foot radio tower was snapped, toppling the top half. Several metal sheds were also destroyed. This damage was rated F2.

The fifth tornado, an F1, was a brief spin-up just east of the Cotton/Stephens County line, or about two miles west of Corum. The tornado touched down briefly in a field, damaging a metal shed and uprooting several trees.

The sixth tornado, an F1, touched down about three miles west-northwest of downtown Comanche and tracked just north of due east, lifting about three miles northwest of Comanche. Several barns and sheds were damaged along this path, ranging from minor shingle damage to complete destruction of outbuildings. At a church about a mile north of Comanche, a steeple was toppled and driven into the church and an outbuilding collapsed at a nearby cemetery. Other damage included a school bus rolled 25 feet, large tree branches downed, and several power lines downed one to two miles northwest of Comanche. This damage was rated as F1 by ground survey teams.

The storm continued across Stephens County and produced a seventh tornado, an F1, in Velma. Trees were twisted and the roof was blown off a water pump station. The eighth and final tornado occurred on the Murray/Garvin County line two and one-half miles northwest of Joy (or one and one-half miles southeast of Wynnewood). No damage was reported with this F0 tornado.

Aside from the tornados, strong winds, large hail, and flash flooding were also reported. Straight line winds up to 80 mph were reported in Frederick in Tillman County. Windows were broken out of a house by baseball-size hail in Tipton, also in Tillman County. Severe straight-line wind damage occurred in and near Corum between 1715 CST and 1725 CST. The roof of a gift shop was partially removed and a beauty shop housed in a mobile home was completely destroyed. A tractor-semitrailer was overturned, a roof was lifted off a church, and a steeple was blown off. Several trees and signs

----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------	---------------------------------	-------	--------------------

and two barns were also destroyed.

Also in Stephens County severe thunderstorm winds destroyed a barn in Faxon. In Jefferson County trees were snapped and sheet iron was blown off a barn in the northwest part of the county.

## OKLAHOMA, Western and Central Cont'd

In Cleveland County severe thunderstorm winds downed two large trees 12 miles east of Noble and snapped one foot tree branches eight miles east of Noble. In Carter County power lines were downed near Healdton and three barns and a wellhouse were destroyed five miles north of Lone Grove. Four houses north of Lone Grove also sustained slight damage to their roofs. In Love County severe winds downed power lines one mile south of Marietta. In Hughes County tree limbs were broken eight miles north of Holdenville by winds reported at 75 mph. In Bryan County four-foot-diameter trees were blown down in Hendrix and large trees were downed and a mobile home was blown onto a Jeep in Calera.

Significant damage also occurred in Seminole County where strong straight line winds with the thunderstorm gust front cut a damage path through Wewoka. Twenty-one houses were damaged, mainly from trees falling on them, and 25 trees were downed across roads.

A car was overturned by flash flood waters in Stephens County just east of Corum. None of the four passengers were hurt.

The thunderstorms in northwest Oklahoma produced hail as large as golf balls 17 miles north of Chester in Major County and eight miles southwest of Alva in Woods County.

Severe thunderstorms across southern and central Oklahoma during the evening produced three weak tornados, large hail, and damaging winds. The first tornado occurred two miles west of Addington in Jefferson County. The second and third tornados were in Carter County three miles east of Fox and south of Healdton. No damage was reported with any of the touchdowns, and all three were rated F0.									
In addition to the tornados, two-inch-diameter hail was reported five miles northwest of Addington in Jefferson County. Severe thunderstorm winds in Cotton County downed power lines and broke windows in several homes and a school in Temple. In Walters, also in Cotton County, trees and power lines were downed and two storage sheds were knocked over by severe winds.									
In Stephens County south of Corum power lines were downed, and in Grady County three miles south-southwest of Pocasset a large shed was demolished and three inch branches were downed. In Oklahoma County in Bethany severe thunderstorm winds felled three one-foot-diameter trees and several six-inch branches. In Murray County a one and one-half-foot diameter tree was uprooted by winds estimated at 60 mph two miles northeast of Sulphur.

<p>Severe thunderstorms across southern and parts of central Oklahoma produced large hail and damaging winds from early morning through early afternoon. Hail as large as golf balls was reported four miles northwest of Stonewall in Pontotoc County. In Hughes County tree limbs were downed three miles southeast of Gerty and three miles east of Citra.</p> <p>In Purcell in McClain County, lightning struck a large tree in front of a funeral home, splitting the trunk and sending splinters as far as a block away. The exterior of the funeral home sustained major damage, as all windows and the glass from two doors were broken out by debris. Branches fell onto and damaged the guttering and siding of the home and a car sitting out front. The lightning bolt also traveled through the root system of the tree and caused the cement sidewalk to break in several places.</p>

									Trees and wires were knocked down in Milford and neighboring Westfall Township.
<b>PAZ069</b> Bucks County	<b>04</b>	<b>1500EST</b>			<b>0</b>	<b>0</b>	<b>1K</b>	<b>?</b>	<b>Winds</b>
									Gusty northwest winds following a cold front uprooted a Norway Maple tree suffering from root rot in Doylestown. The tree bent and broke gutters and damaged the corner of a roof. Damage to the house was estimated at \$1 thousand.
<b>PAZ037&gt;071</b>	<b>04</b> <b>05</b>	<b>2200EST-</b> <b>1000EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Extreme/Record Cold</b>
									An unseasonably cold arctic air mass moved into the Northeast United States. Several records were established as low temperatures fell into the teens in Northeast Pennsylvania and the lower and mid 20s in Southeast Pennsylvania. The low temperature of 19F on the 4th in Avoca tied the record low for the date set originally in 1954. Several record lows were set the next morning including 17F in Avoca, 19F in Williamsport and 21F in Allentown. While it was too early in the growing season for the cold to affect crops, the blooms on ornamental trees (e.g., magnolias) in the southeast part of the state were damaged.
<b>PAZ037&gt;040</b>	<b>08</b> <b>08</b>	<b>0400EST-</b> <b>1600EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Snow</b>
									A warm front approaching Northern Pennsylvania the morning of the 8th brought snow to the northern tier counties. Accumulations of three to five inches fell in Bradford, Susquehanna, Tioga and Wayne Counties with isolated amounts of six inches near the New York State border in Brackney and Sayre. Milder air changed the snow to sleet and freezing rain before a change to plain rain occurred in the middle of the afternoon. The mixed precipitation resulted in many minor accidents.
<b>PAZ038&gt;040</b>	<b>09</b> <b>09</b>	<b>1200EST-</b> <b>2300EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Freezing Rain/Sleet</b>
									An arctic cold front crossed Northeast Pennsylvania during the afternoon of the 9th. A shallow layer of cold air behind the front caused rain to mix with freezing rain and sleet, before a changeover to snow. The snow only accumulated an inch or two, but icy roads from the freezing precipitation and subfreezing temperatures caused many minor accidents.
<b>Perry County</b> New Bloomfield	<b>09</b>	<b>1740EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

A squall line of severe thunderstorms caused considerable damage in central and northeast parts of York County. A wind gust to 100 mph occurred within the city of York. In Newberry Township a family of three was injured when their trailer rolled over. Another person in Newberry Township was injured by a falling tree.									
The worst property damage occurred in Dover, East Manchester (Mount Wolf Borough), Manchester and York. In Dover, roof edges were flipped over in Delmar Estates. In East Manchester/Mount Wolf a three story barn was lifted from its foundation. Several traffic and business signs along Pennsylvania State Route 181 were damaged or destroyed. A downed pole at a Geo dealership in Manchester destroyed several automobiles. In York several roofs were torn from houses including three in a row on Jackson Street.									
Other damage throughout the county included a tower blown over at the Brunner Island Plant, a destroyed mobile home in Conewago Township, closed roads because of fallen trees in Fairview Township, a destroyed mobile home in Lower Windsor Township, a double billboard and construction sign damage along Interstate 83 in Newberrytown and hundreds of trees uprooted in York Haven.									
About 11,000 Metropolitan Edison customers lost power mainly in Cly, Manchester and York Haven. An additional 8,500 Adams Electric customers lost power in York and Adams Counties.

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Injured	Estimated Damage Property	Crops	Character of Storm
----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------	---------------------------------	-------	--------------------

## PENNSYLVANIA, Eastern Cont'd

In Maytown, planes were flipped over at the airport. In Marietta several trees fell on cars. In the Silver Spring area, aluminum siding was wrenched from 80 homes. Several trees slammed into homes. A porch was blown apart and a house under construction was badly damaged. The roof of the QVC warehouse was almost completely torn away. Several warehouse buildings owned by the Charles Chip Company were severely damaged. The straight line winds were so strong they rolled a 20 foot metal corn crib at the warehouse for half a mile.

Other damage in the county included several roofs blown off barns in Mount Joy, West and East Donegal Townships. Planes were also blown over at the Donegal Spring Airport in Mount Joy. Siding and shingles were stripped from a few houses. In Elizabethtown an uprooted tree landed on a house and caused about \$40 thousand in damage. In East Donegal Township a trailer rolled over twice and was destroyed. The roof of a chicken barn blew away and 20,000 chickens subsequently died. In East Hempfield Township the winds leveled nearly five acres of woods.

Around the city of Lancaster wind related damage also occurred. A gust to 85 mph blew over the satellite antenna of WGAL-TV. A building collapsed at 84 Lumber in Centerville. Numerous trees were uprooted. One fell into a house on St. Mary Street, a few fell on cars. Roofs of a printing center and an elementary school partially blew away. Trees and power lines were also knocked down in Millersville. During the height of the storm 26,000 Pennsylvania Power and Light customers lost power as three 69,000 volt transmission wires were knocked down. No injuries were reported.

### Lebanon County Eastern

<b>09</b>	<b>1840EST-</b>								
<b>09</b>	<b>1910EST</b>				<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

Severe thunderstorms uprooted trees and knocked down wires in eastern parts of Lebanon County. The hardest hit townships included Bethel, Heidelberg, Jackson and Mill Creek.

### Lancaster County Manheim

<b>09</b>	<b>1845EST</b>								
					<b>0</b>	<b>0</b>	<b>80K</b>	<b>?</b>	<b>Lightning</b>

Lightning struck a house in Manheim Township. The subsequent fire destroyed its foyer and garage and resulted in about \$80 thousand of damage to the house.

### Berks County Western

<b>09</b>	<b>1850EST</b>								
					<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

Severe thunderstorms knocked down trees and wires in western Berks County.

### Montgomery County 1 N Pottstown

<b>09</b>	<b>1915EST</b>								
					<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

Trees and wires were knocked over just north of Pottstown.

### Chester County Landenburg

<b>09</b>	<b>1935EST</b>								
					<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

Lawn furniture was tossed around in the backyards of several homes in Landenburg.

### Bucks County Countywide

<b>09</b>	<b>1945EST</b>								
					<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

Scattered large tree limbs and wires were toppled throughout the county. One of the hardest hit areas was Southampton.

### Montgomery County Melrose Park

<b>09</b>	<b>1955EST</b>								
					<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds (G52)</b>

### Delaware County

<b>09</b>	<b>2000EST</b>								
					<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Thunderstorm Winds</b>

Severe thunderstorms knocked down wires in widely scattered locations in the county.

<b>Newport County</b>	<b>04</b>	<b>1515EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>0</b>	<b>Thunderstorm Winds</b>

A fast moving squall line preceding a strong Arctic cold front produced strong to severe thunderstorms with wind gusts of 40 to 60 mph. Some locations experienced gusts in excess of 60 mph. The National Weather Service at T.F. Green Airport in West Warwick recorded a peak wind gusts to 58 mph. Numerous trees were reported blown down in Scituate, Cumberland, and Lincoln. Trees also were reported knocked down in Warwick and West Greenwich. In Richmond, which is in Washington County, a 20 x 100 foot section of roof was blown off of the state police barracks. In Newport County, in both Middletown and Tiverton, power lines were reported knocked down.

<b>RIZALL</b>	<b>05</b>	<b>0300EST- 1500EST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>0</b>	<b>High Winds</b>
---------------	-----------	-----------------------------	--	--	----------	----------	----------	----------	-------------------

Strong and very cold west to northwest winds accompanied a late season blast of Arctic air. Peak gusts of from 40 to 60 mph occurred across most of the state. Only a few scattered power outages were reported. A record low temperature of 20 degrees was recorded in Providence.

## SOUTH DAKOTA, Central

SDZ006-018 Northeast SD	01 30	0000CST- 2400CST			0	0	?	0	Flooding
----------------------------	----------	---------------------	--	--	---	---	---	---	----------

Flooding occurred along the James River through the month of April. Above normal precipitation in March and April and rapid snowmelt from two significant winter storms in April kept the James River above flood stage throughout the month. Water levels were three to six feet above flood stage at the beginning of the month and two to nine feet above flood stage at the end of the month. A significant amount of farmland and several roads were flooded throughout the month.

SDZ016>018-033> 037-045-048-051 Central SD	08 12	0600CST- 2300CST			0	0		0	Heavy Snow
--	----------	---------------------	--	--	---	---	--	---	------------

Ten inches to two feet of snow fell in central South Dakota in a five day period. Many roads became impassable. Several businesses, government offices, and schools were closed on the 11th. Twenty-four inches fell at Ree Heights and Gettysburg, 20.0 inches at Faulkton, 18.0 inches at Kennebec, 16.0 inches at Pierre, and 10.0 inches at Doland.

SDZ003>005-009- 010-015 North-Central SD	10 12	0200CST- 0400CST			0	0	?	0	Heavy Snow
--	----------	---------------------	--	--	---	---	---	---	------------

One to three feet of snow fell in north-central South Dakota in a three day period. Many schools and businesses were closed on the 11th. Some calf losses occurred in Dewey County. Snowfall amounts included 34.0 inches at Selby, 22.0 inches at Eureka, 19.0 inches at Timber Lake, 15.0 inches at Roscoe, 14.0 inches at Mobridge, and 13.0 inches at McLaughlin.

SDZ006>008-011 Northeast SD	10 12	2200CST- 1000CST			0	0	0	0	Heavy Snow
--------------------------------	----------	---------------------	--	--	---	---	---	---	------------

Heavy snow fell in northeast South Dakota in a three day period. Several schools and businesses were closed on the 11th. Snowfall amounts included 13.0 inches at Webster, 12.0 inches at Aberdeen, 8.0 inches at Britton, and 6.0 inches at Sisseton.

SDZ016-017-033> 037-045-048-051 Central SD	17 18	2000CST- 1300CST			0	0	.5M	0	Heavy Snow
--	----------	---------------------	--	--	---	---	-----	---	------------

Eight inches to two feet of snow fell in central South Dakota in a two day period. Many businesses, schools, and roads were closed on the 18th. Hundreds of power poles were downed due to the heavy snow and strong winds in Faulk, Hughes, Sully, Hyde, Hand, Lyman, and Buffalo Counties leaving thousands of people without power. Some significant calf losses also occurred (around 10 percent with as much as 20 percent) especially in Hand County. Snowfall amounts included 24.0 inches at Vivian, Ree Heights, and in the Murdo area, 23.0 inches at Kennebec, 18.0 inches at Highmore, 16.0 inches at Blunt, 15.0 inches at Miller and Faulkton, and 8.0 inches at Gettysburg.

<b>SDZ004&gt;008-010-011-016&gt;018-034&gt;037-051</b>	13 30	0000CST- 2400CST			0	0	5.25M	0	<b>Flooding</b>
--	----------	---------------------	--	--	---	---	-------	---	-----------------

**Central, North-Central and Northeast SD** Flooding, resulting from snowmelt from the two major snowstorms in April and saturated soils, caused extensive road damage and inundation. This caused several road closings and numerous flooded basements in many counties. In addition, many lakes were overfull in Day and Campbell Counties. Flooded farmland caused severe delays in small grain planting. Spink, Sully, McPherson, and Brown Counties were declared disasters in April.

## SOUTH DAKOTA, Southeast

<b>SDZ038-053-059-060-065-068-069- James River in East-Central/Southeast South Dakota</b>	01 30	0000CST- 2400CST			0	0	0.3M	0.1M	<b>Flooding</b>
---	----------	---------------------	--	--	---	---	------	------	-----------------

Flooding along the James River continued from the end of March through all of April. All time record stages were reached near Forestburg and Mitchell on the 22nd. Some homes, other buildings, and parks were flooded. There was extensive flooding of farms near the river, resulting in certain planting delays. Some roads were flooded.

<b>SDZ019-020-022-023-038&gt;040-050-052&gt;071- Southeast and East-Central SD</b>	08 11	0500CST- 1700CST			0	17	.15M	0	<b>Heavy Snow, Freezing Rain</b>
--	----------	---------------------	--	--	---	----	------	---	----------------------------------

Heavy snow and freezing rain fell over a four day period. Two feet of snow fell at Platte and Wessington Springs, and most of the area received near or more than a foot of snow. Most areas received some freezing rain, but the worst icing problems were in Clay and Union Counties in the far southeast corner of the state. In this area there was widespread damage to power lines, poles, and trees. Several vehicle accidents were caused by the freezing rain and slushy snow. The snow blocked roads and closed some schools and businesses. The storm caused a struggle with calving, but no serious losses were reported.

<b>SDZ050-052-057-058-063-064- South Central SD</b>	17 18	2000CST- 1400CST			0	0	0.3M	0	<b>Heavy Snow</b>
---	----------	---------------------	--	--	---	---	------	---	-------------------

Heavy wet snow fell with accumulations as great as two feet in Gregory. Numerous power lines and hundreds of poles were downed, leaving many residents without power. Roofs of businesses in Plankinton and Platte collapsed under the weight of the snow, causing damage to vehicles and equipment inside. The snow also caused minor accidents and closed some roads. Livestock losses were reported, especially to newborn calves.

<b>SDZ019-020-022-023-038&gt;040-050-052&gt;056-057&gt;062-063&gt;066- East-Central and Southeast SD</b>	19 30	1100CST- 2400CST			0	0	1.5M	0.2M	<b>Flooding</b>
--	----------	---------------------	--	--	---	---	------	------	-----------------

Flooding, due to snowmelt and some heavy rain, washed out or otherwise damaged many roads. Also flooded were many basements, some homes above basement level, yards, and parks. Flooding of farms was extensive and was certain to delay planting in many areas. The flooding occurred in the form of standing water, high water tables, small stream overflow, and rising water levels on some lakes.

<b>SDZ003&gt;006-009-010-014&gt;018-024-032&gt;038-043&gt;052-057-058-063- Central SD, Northern Black Hills</b>	26 27	0600CST- 1800CST			0	0	.01M	.01M	<b>Heavy Snow</b>
---	----------	---------------------	--	--	---	---	------	------	-------------------

Heavy snow fell in most of central South Dakota and in the northern Black Hills of South Dakota. Heavier accumulations included 14 inches at Murdo, 13 inches at Lead, and 12 inches at Eureka, Leola, and Buskala Ranch. A few traffic accidents were reported, and many other vehicles slid into ditches. There was damage to power lines and poles. Livestock losses were feared as the snow fell during the calving season, although this could not be assessed in the short term.

---------------------------------	------	------	--	--	---	---	---	---	-------------

Heavy snow fell over eastern portions of Western South Dakota leaving a narrow; but elongated area of snow ranging from a few inches over the northern Black Hills to over 27 inches Bennett, Jackson, eastern Shannon, Todd, Haakon and eastern Pennington counties. Roads and schools were closed, with damage limited primarily to automobile accidents.

<b>SDZ042&gt;044</b>	17- ?	19 ?			?	?	?	?	<b>Snow</b>
----------------------	-------	------	--	--	---	---	---	---	-------------

Heavy snow once again closed portions of south central South Dakota with 8 to 30 inches of snow. Those hardest hit were Bennett and Jackson counties.

## TENNESSEE

<b>Dekalb County Smithville</b>	07	1400CST			0	0	5.0K	0	<b>High Winds</b>
-------------------------------------	----	---------	--	--	---	---	------	---	-------------------

One house had its front porch roof blown off.

<b>TNZ004&gt;010-021&gt; 033-040&gt;047- 052&gt;065-071- 075&gt;078-089&gt; 097</b>	11	0630CST- 1530CST			0	4	1.0M	0	<b>High Winds</b>
---	----	---------------------	--	--	---	---	------	---	-------------------

A large part of the state experienced high winds after a line of thunderstorms moved through. The winds were not associated with the thunderstorms. Winds speeds exceeded 70 mph at times. Two persons were injured in Clarksville (Montgomery County) when a tree was blown on top of the truck they were in. Another person was injured in Decherd (Franklin County) when the car they were driving was blown off the road. A fourth person was also injured in Decherd when they were struck by a portable sign. A church that was under construction in Clarksville was destroyed. A greenhouse collapsed in St. James (Greene County). A church steeple was broken off in McEwen (Humphreys County). A boat dock and a 17-foot fishing boat were damaged in Wilson County. One person was trapped in an elevator that had lost power on the campus of East Tennessee State University in Johnson City. There were widespread reports of damage to mobile homes and outbuildings. Numerous homes and businesses suffered roof or awning damage. Trees, power lines and power poles by the hundreds were blown down.

Severe thunderstorms near and just south of the Red River in North Texas produced three tornados, baseball-size hail, and damaging straight-line winds.

The first two tornados occurred in Wilbarger County five miles south of Lockett and four miles west of Grayback. The storm then moved into Wichita County where the third tornado was reported on the Red River 10 miles west-northwest of Burkburnett. No damage was reported with any of the three touchdowns and all were rated as F0 tornados.

In addition to these tornados, baseball-size hail was reported in Oklahoma in Wilbarger County, and severe thunderstorm winds downed trees and damaged two hay barns near Windthorst in Archer County. Two miles northeast of Oklahoma, in Elliot, hail as large as quarters was found on the ground a full 24-hours after the event.

<b>North Texas</b>	<b>19</b>	<b>early afternoon and Evening</b>							<b>Tornadoes</b>
									As an east-west warm front moved northward across north-central Texas during the early afternoon, strong thunderstorms developed and became severe producing a series of small tornadoes from Ellis/northern Navarro Counties northeast into Hunt County. Some wind damage and large hail was also reported in these storms.
									During the early evening hours an intense line of thunderstorms formed across western parts of north Texas and moved rapidly eastward. A supercell developed within the line across Western Palo Pinto County around 1900 CST and by 1920 CST was producing large hail south of Palo Pinto. During the next two hours this storm would produce numerous reports of large hail, high winds, and four tornadoes. The first south of Mineral Wells at 1942 CST, the second near Millsap at 1948 CST, the third in South Fort Worth at 2040 CST, and the fourth in Dallas at 2102 CST. Total damage for the Fort Worth and Dallas tornadoes is estimated at \$10 million.

<b>North Texas</b>	29	evening- night							<b>Hailstorms</b>

During the late evening of the 29th, four supercell thunderstorms developed and moved south-southeast across north Texas producing numerous reports of golf ball- to baseball-size hail, with some hail up to 3.5 inches in diameter in Grapevine and Euless. The first storm came across the Red River into Grayson County moving almost due south before dissipating in eastern Ellis County. Storms two and three developed in northwest and southwest Denton County, respectively, and moved southeast across the Dallas/Fort Worth Metroplex causing over \$220 million in damage before becoming non-severe in Freestone County. Storm two moved across the DFW airport damaging over 100 planes, resulting in hundreds of flight cancellations, and closing the airport temporarily. The fourth storm developed in northern Hood County, then moved nearly due south before dissipating in central Bosque County.

<b>Sterling City</b>	<b>03</b>	<b>2338CST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Hail (0.75)</b>
<b>3 N Sterling City</b>	<b>03</b>	<b>2355CST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>?</b>	<b>Hail (1.75)</b>

The Lamb County Sheriff's Office reported golf ball-size hail near Sudan. The public reported dime-size hail in Plains. Spotters reported dime-size hail west of Brownfield. In Sterling County, the sheriff's office reported dime to golf ball-size hail in and near Sterling City.

A severe thunderstorm that produced marginally severe hail in southeast New Mexico became supercellular as it encountered deeper moisture in West Texas. Movement switched from northeast to southeast around 2000 CST. Quarter-size hail was first reported by a SKYWARN spotter east of Lamesa. Two-inch hail was reported near the Dawson-Martin County line near Patricia. Storm chasers passing through this area reported that up to two-inch hail was found in a three mile swath on the ground in the vicinity of Patricia. In Three Leagues, significant house damage occurred, and at least one vehicle had its windshield broken by hail.

This supercell storm then moved southeast at 25 miles an hour into Howard County. Severe hail reports continued for the next two hours. Almost all the Big Spring reports came from SKYWARN spotters, with the sheriff's office reporting up to baseball-size hail in Coahoma. Later reports included baseball-size hail also in Big Spring. The widespread, large hail from this storm caused property damage over most of Big Spring, totalling \$20 million. Doppler radar indicated a very strong mesocyclone associated with this storm while it was over Howard County. Also a prolific rain-producer, this storm produced extensive street flooding in Big Spring and along parts of Interstate 20 near Big Spring.

Severe storm developed over West Texas along and ahead of the dryline. There were numerous reports of dime to golf ball-size hail with these storms, though no significant damages were reported. Two brief tornadoes were reported. The first (technically a landspout) occurred near Lubbock's southern city limits at 1351CST. It damaged several signs and a shed. It was seen by thousands of citizens in Lubbock, and was well seen on "skycam" cameras operated by two local TV stations on their towers. The other was reported by an off-duty NWS employee in extreme southern King County. It occurred on ranchland and caused no damage.

Several weeks of above normal temperatures and low humidities, combined with a dry and mild winter, aided in igniting numerous wildfires in the Shenandoah Valley during the first week of April. Strong winds associated with a mid-week cold front contributed greatly to fire ignition. In Nelson County (VAZ036), 1200 acres were scorched, many at a pine tree plantation. Fire suppression costs were estimated at \$17 thousand. In Page County (VAZ029), 12 fires burned over 1100 acres; however, it was possible that 450 acres were destroyed as a result of arson. In Warren County (VAZ030), a house fire ignited a steep wooded area, threatening 300 homes before being contained. In Rappahannock County (VAZ040), another house caught fire and ignited 20 acres of nearby forest before being contained.

Statewide, during the week of April 4 - 10, there were 288 fires (not including federal forest lands) which burned over 4000 acres, half of the March-April total. Statewide damage estimates were as follows: \$600 thousand in property damage; \$430 thousand in timber damage; another \$430 thousand in fire suppression costs.

VAZ028, 031	05	0400EST-0700EST			0	0	0	?	Agricultural Freeze
-------------	----	-----------------	--	--	---	---	---	---	---------------------

A late-season arctic air mass caused temperatures to plunge into the mid 20s during the early morning of the 5th over the northern Shenandoah Valley. The cold air was accompanied by brisk northwest winds of 15 to 20 mph, and dew points fell into the single digits. Portions of Frederick and Clarke County's apple and peach orchards suffered minor scattered damage, since temperatures remained below freezing for several hours and approached or fell below the minimum kill level of 25 degrees. Peach buds had been in an accelerated growth state due to the mild weather of late March.

<p>Several weeks of above normal temperatures and low humidities, combined with a dry and mild winter, aided in starting numerous wildfires in extreme southwest Virginia in early April. Strong winds associated with a mid-week cold front may have also contributed to the fire threat. The blaze in Yellow Rocks was contained quickly, even though fire fighters had to rappel the rocky cliff's nearby to do so. A total of 141 fires burned 1550 acres in the five counties; however, fires in Russell and Scott Counties may have been arson-related.</p>

A series of squall lines with severe thunderstorms raced northeastward across southern Wisconsin and generated damaging straightline winds. Rock County suffered the most damage with the Beloit - Janesville area (Rock County) getting the brunt of the severe storms. Four farms northwest of Beloit sustained damage to silos, barns, sheds, and outbuildings. Damage was about \$350 thousand. Two funnel clouds were sighted by spotters northwest of Beloit. Downed power lines just west of Edgerton (Rock County) created a chain reaction of power outages across Rock County. A roof was torn off a shed near Edgerton. Damage in the Edgerton area was about \$50 thousand. About 10,000 Rock County customers were without electricity for 25 minutes. Trees, power lines, and some small barns were blown down in Clarno and Brooklyn townships (Green County). Intense winds blew down several large trees near Beaver Dam (Dodge County). Large trees were toppled by the damaging winds around Benton (Lafayette County). Powerful winds blew down several road signs and large trees in Hazel Green (Grant County).									
<b>WIZ001-002- Extreme Northwest Wisconsin</b>	<b>18 18</b>	<b>1300CST- 2000CST</b>			<b>0</b>	<b>0</b>	<b>?</b>	<b>0</b>	<b>Heavy Snow</b>
A well-anticipated snow storm hit the area along the Lake Superior shoreline with heavy wet, slushy snow that started off as rain. Cornucopa (Bayfield County) had the greatest accumulation of seven inches, followed by six inches at Superior (Douglas County) and Poplar (Douglas County). Numerous vehicle accidents were indirectly related. East winds gusting to 45 mph created near whiteout

Port Washington	18	1615CST			0	0	?	0	Hail (0.88)

Scattered severe thunderstorms generated damaging winds and hail up to one inch in diameter across southern Wisconsin. Powerful winds blew down many large trees and power lines in Grant County. Hail was the main afternoon event over southeast Wisconsin. One inch diameter hail was produced by two separate storms over Kenosha County. As with the morning (May 18th) severe weather across southern Wisconsin, the afternoon storms raced northeastward at speeds of 50 to 60 mph.

Kenosha County	30	1045CST			0	0	?	0	Flood
New Munster									

Widespread rains averaging one to two inches fell on the 26th and 27th over southeast Wisconsin, resulting in minor flooding on two rivers. The Root river in Racine County exceeded flood stage of eight feet with a crest of 9.40 feet early in the morning on the 28th. The Fox River in Kenosha County exceeded its flood stage of 10 feet with a crest of 10.43 feet in the early evening hours on the 28th. The minor flooding was confined to lowland riverside locations.

## WISCONSIN, West Central

<b>WIZ001-002</b>	18	1100CST-							
Far Northwest		1800CST			0	?	?	0	Heavy Snow

A narrow band of heavy snow fell from near Dairyland to Superior and along the south shore of Lake Superior through Poplar to Cornucopia. Snowfall amounts ranged from five to six and one half inches. The snow, which had began as rain, made roads very slippery and caused numerous accidents. East winds gusting over 45 mph created near whiteout conditions and piled up ice in the Duluth/Superior Harbor.

# Storm Data and Unusual Weather Phenomena

April 1995

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Injured	Estimated Damage Property	Crops	Character of Storm
----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------	---------------------------------	-------	--------------------

Heavy snow fell in the Big Horn Mountains leaving 6 to 12 inches of snow. A remote location (Bald Ridge) in the highest elevations of the southern Big Horns reported two feet of snow.

<b>WYZ068-070</b>	<b>10</b>	<b>0600MST-</b>							
	<b>11</b>	<b>1500MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

Extreme southeast Wyoming had a period of snow which left five to nine inches in many locations. Winds of 20 to 30 mph made for much blowing and drifting snow and hazardous conditions.

<b>WYZ010&gt;012-062&gt;064</b>	<b>16</b>	<b>0000MST-</b>							
	<b>17</b>	<b>1200MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

Heavy snow fell in the Wind River mountains and along the eastern foothills. Dubois had 11 inches of snow while Burris (25 miles southeast of Dubois) had eight inches. The southeast Wyoming mountains received six to eight inches of snow during the evening of the 16th and early on the 17th.

<b>WYZ055-057-058</b>	<b>17</b>	<b>0000MST-</b>							
	<b>17</b>	<b>1800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

A period of snow fell over northeast Wyoming. Snow amounts of five to seven inches occurred.

<b>Laramie County Cheyenne</b>	<b>21</b>	<b>1755MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Funnel Cloud</b>
------------------------------------	-----------	----------------	--	--	----------	----------	----------	----------	---------------------

A funnel cloud was observed by the public and by National Weather Service employees. It lasted 15 minutes before dissipating.

<b>WYZ001&gt;003-006</b>	<b>24</b>	<b>1800MST-</b>							
	<b>25</b>	<b>0800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

Heavy snow fell in the northwest mountains of Wyoming. Yellowstone National Park had 6 to 12 inches of snow. Togwotee Pass (40 miles northeast of Jackson) had 12 to 16 inches of snow.

<b>WYZ010&gt;012-050-052-063-064</b>	<b>24</b>	<b>2100MST-</b>							
	<b>25</b>	<b>1800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

Some heavy snow fell in west-central Wyoming as well as in the northern and southeast Wyoming mountains. Lander had nine inches of snow as did Dubois. The Big Horn mountains of northern Wyoming had 6 to 10 inches of snow. The southeast Wyoming mountains received six to eight inches.

## WYOMING Cont'd

<b>WYZ001&gt;003-006-010</b>	<b>28</b>	<b>0800MST-</b>							
	<b>30</b>	<b>0800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

A moist west flow stayed over western Wyoming for two days leaving more snow in the northwest and west-central mountains. Most of Yellowstone National Park had 6 to 12 inches of snow with some areas getting up to 15 inches. Dubois received 12 inches of snow out of the storm.

<b>WYZ057</b>	<b>29</b>	<b>0600MST-</b>							
	<b>30</b>	<b>1800MST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>Heavy Snow</b>

The extreme northeast corner of Wyoming in the black hills region got a six to eight inch snowfall.

## ALASKA, Northern

<b>AKZ024</b>	<b>14</b>	<b>1800AST</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>High Winds</b>
---------------	-----------	----------------	--	--	----------	----------	----------	----------	-------------------

Deepening storm moving to central Bering Sea with occluded front moving north of Saint Lawrence Island. Winds 39 gusts 44 knots at Gambell; verified only at Gambell.

<b>AKZ024</b>	<b>28</b>	<b>1600</b>			<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>High Winds</b>
---------------	-----------	-------------	--	--	----------	----------	----------	----------	-------------------

Storm over southwest Bering Sea moved toward Gulf of Anadyr. Occluded Front moved north beyond Bering Strait by the morning of the 29th. winds were from the south; maximum occurred at Savoonga: 39 gusts 48 knots.

**Definition of Fujita Tornado Scale (F scale)**

(F0) Gale tornado (40-72 mph): Light damage  
Some damage to chimneys; break branches off trees; push over shallow-rooted trees; damage sign boards.

(F1) Moderate tornado (73-112 mph): Moderate damage  
The lower limit (73 mph) is the beginning of hurricane wind speed; peel surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads.

(F2) Significant tornado (113-157 mph): Considerable damage  
Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light-object missiles generated.

(F3) Severe tornado (158-206 mph): Severe damage  
Roofs and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted; heavy cars lifted off ground and thrown.

(F4) Devastating tornado (207-260 mph): Devastating damage  
Well-constructed houses leveled; structure with weak foundation blown off some distance; cars thrown and large missiles generated.

(F5) Incredible tornado (261-318 mph): Incredible damage  
Strong frame houses lifted off foundations and carried considerable distance to disintegrate; automobile-sized missiles fly through the air in excess of 100 m; trees debarked; incredible phenomena will occur.

(F6-F12) (319 mph to Mach 1, the speed of sound):  
The maximum wind speeds of tornadoes are not expected to reach the F6 wind speeds.

(F0+F1) *Weak Tornado*  
(F2+F3) *Strong Tornado*  
(F4+F5) *Violent Tornado*
